Spencer,1986 *Guide to Curriculum Development. Turning Points* Ben Lummis,2001 The educational needs of middle school students are truly unique In no other period of PreK 12 education can one find such a wide range of physical social and cognitive development among students For students the middle school years can be a time of both great vulnerability and great responsiveness to change These years are highly formative for behavior patterns in education and health that have enduring lifelong significance The challenge for middle schools is to help provide the building blocks of adolescent development and preparation for adult life Developing curriculum that meets the needs of middle school students is a complex process that rarely follows a prescribed pattern Teachers may come up with ideas for projects themes and activities on the way to work in the middle of class during a conversation with a colleague and even in the shower Some teachers begin with a theme while others start with habits of mind they want their students to acquire Some teachers use state frameworks and standards as a starting point to curriculum development Still others build a unit from an idea for a project The purpose of this guide is not to dictate how teachers should develop their curriculum but rather to propose that certain basic principles supported by Turning Points work in schools underpin curriculum development The purpose of this guide is to communicate the Turning Points approach to curriculum development teaching and assessment It offers specific tools which teachers and schools can use as they design curriculum develop assessment tasks and create the classroom practices that will lead to significant student learning and growth
