references glossary and bibliography Taking a thematic approach this textbook demonstrates how studying the first example of Asian industrialisation can provide the basis for an alternative non western narrative of development As it such is an important resource for undergraduate and postgraduate courses on the Japanese economy as well as comparative economic development and economic history more generally *Japanese Economic Development* Kunio Yoshihara,1994 This book first published in 1977 and extensively updated and rewritten for this third edition provides a short introduction to Japanese economic development It stresses the importance of non economic factors in Japan s success especially those relating to its institutions and social structure which have produced a unique management system and a strong work ethic Yoshihara places greater emphasis than in previous editions on Japan s ability to blend modern values and institutions with those from the pre modern period as a major reason for its economic achievements The Economic Development of Japan William W. Lockwood,1970 *Japanese Economic Development* Carl Mosk,2007-11-26 This book presents three distinct approaches to understanding how and why Japan made the transition from a relatively low income country mainly focused on agriculture to a high income nation centered on manufacturing and services Making a case for over determination in economic behaviour the authors argue that individual firm level and governmental behavior is simultaneously determined by the interaction of markets norms and structures and that change over time is rarely if ever limited to the economy operating in isolation from social norms and structures The Development of Japan Kenneth Scott Latourette,Japan Society (New York, N.Y.),1926

Economic Development of Japan : Growth and Structural Change William Wirt Lockwood,1968 **Economic Growth in Japan and the USSR** Angus Maddison,2013-11-05 In terms of output the USSR and Japan account for one fifth of the world s economy occupying second and third places behind the United States Japan has the world s fastest growth of per capita income and the USSR has not lagged far behind But a century ago they were static feudal societies This study analyzes the policies which enabled them to transform their economies and to catch up with the developed world The strategies of the two nations adopted have been very different Japan has maintained small farms and factories developed a labor intensive technology and has successfully penetrated the world export markets The USSR on the other hand has created giant farms and factories and remained fairly isolated from world trade Since 1945 the USSR has devoted one eighth of her resources to military purposes Japan practically nothing In *Economic Growth in Japan and the USSR* Angus Maddison offers a comparative analysis of the growth experience of these two countries that greatly enlarges our knowledge of the development process A better understanding of their past experience can be particularly illuminating and relevant for economic policy in developing countries today This classic text was first published in 1969 The Arc of Japan's Economic Development Arthur Alexander,2007-11-05 This core textbook is the definitive overview of the Japanese economy charting its history from before the Meiji restoration through to the contemporary scene and the implications of the ongoing financial crisis The Economic Development of Japan ,1990 **Learning from the Japanese** E. Wayne Nafziger,1995 This book

looks at Japan's early economic modernization to see if today's low income countries can learn any lessons. The author focuses on education, technology, policy, capital formation, the transfer of savings from agriculture to industry, state aid to the private sector, improvement engineering in the informal sector, low wages, industrial dualism, export expansion, and resistance to Western imperialism, a strategy which included acquiring its own empire under Japan's guided capitalism.

The Economic Development of Japan and Korea Chung H. Lee, Ippei Yamazawa, 1990-01-08. Sponsored by the East West Center in Honolulu, this volume brings together papers by a distinguished group of Korean and Japanese experts to examine the similarities and differences between the development experiences of Japan and Korea. In an attempt to identify the common factors which could account for the phenomenally successful economic development of the two countries, the contributors explore six topics and their roles in economic development: trade, government, the impact of imported technology, financial systems and policies, agriculture, and the educational and social basis of development. As the first volume to present an extended comparison of the two economies in a single source, *The Economic Development of Japan and Korea* will be of significant interest to scholars in development economics, Asian studies, and international economics. The contributors demonstrate that although there are both similarities and differences in the economic development of Japan and Korea, the two can be regarded as having followed the same general pattern of development. Both countries are resource poor and have relied on trade as the engine of development. In addition, both governments have played an active role in economic development, in marked contrast to the situation in the West. By exploring in turn the role played by such factors as export trade, public policy, and education, the contributors show that the success of Japan and Korea can be attributed to the right combination of a private market system and the autonomous state. Their conclusions have important implications for the governments of other developing countries struggling with problems and issues inherent in attempts to foster sustained economic growth.
