

BLOOD IVORY

Exposing the myth of a regulated market

Two legal sales of ivory stockpiles have failed to stem the flow of illegal ivory to East Asia, especially to China. In fact, the opposite has occurred, with the sales stimulating the market and contributing to an increase in illegal ivory flows and the poaching of elephants. In China, the latest legal sale in 2008 has clearly failed to either reduce the price of ivory or curb illegal trade. This failure should be recognised and not repeated. The single biggest threat to elephants is now the largest *regulated* domestic market.

The Environmental Investigation Agency (EIA) has been documenting the illegal international trade in ivory for almost three decades and since the late 1990s has been focusing specifically on the role of China as an emerging market for illegal ivory.

Several EIA investigations in China between 1999 and 2010 document a burgeoning illegal market that has grown year on year and shows no sign of abating. Yet although this evidence has been provided to decision-makers and enforcement authorities, the Convention on International Trade in Endangered Species (CITES) continues to sanction limited international trade in ivory. EIA has repeatedly argued that allowing any legal sale of ivory simply provides a means to launder illicit ivory and stimulates the market, resulting in an increase in the poaching of elephants.

China's ivory regulation and control system was initially introduced in 2004. However, China has been repeatedly highlighted in formal CITES documents as the main end destination in the international smuggling of ivory.¹ A host of analyses between 2004-08 stressed that China's control system remained flawed and described the adoption of the certification system as patchy, with some merchants, including many large-scale traders, continuing to deal in ivory from illicit sources. Violations of the State Forestry Administration system were commonplace and loopholes existed, and continue to exist. Mammoth and 'antique' ivory are still permitted

for export, and EIA has documented uncertified ivory products for sale in China in 2005, 2006, 2008, 2009, 2010 and 2011 as far afield as Lhasa (Tibet Autonomous Region), Xining (Qinghai Province) and Linxia (Gansu Province). Despite such evidence illustrating that China's control system was not fit for purpose, the decision to grant buyer's status went ahead at the 57th Meeting of the Standing Committee (SC) to CITES in July 2008.²

The decision was predicated on the basis that China had implemented strict domestic trade regulations whereby all pieces weighing less than 50g must be accompanied by a paper CITES permit which should be displayed alongside the piece; anything over 50g must have a photographic ID card (similar to a credit card) which must also be displayed alongside the piece. A further rationale for supporting this decision was the belief that the sale of over 100 tonnes of 'legal' stockpiled ivory would flood the market and bring down the price of ivory, thereby undercutting the illegal market and so reducing poaching.

In November 2008, China bought just over 60 tonnes of stockpiled ivory from Botswana, Namibia, South Africa and Zimbabwe at auction.
