**Developing Humanness, Bits and Pieces** Evelyn Groth Eldridge, Alice W. Petersen, 1972     Developing Humanness, Bits and Pieces Alice Petersen, Evelyn Groth Eldridge, 1975     *Science, Cells and Souls* Neville Moray, 2014-12-08 To think about the mind the self the will and consciousness used to be left to philosophy Today neuroscience genetics and computer science seem poised to take over these topics Can we find a way to combine modern science with traditional ideas and ways of thinking What is life Can we make it Can we make a person Can machines think Do we need the notion of a soul How does consciousness arise This book shows how to think about the relation between science and philosophy in order better to understand human nature in the light of modern and traditional knowledge The aim is not to prove that one approach is better than the other but to help the reader to form and discuss their own questions It is a vessel to let you set sail on your own voyage of intellectual discovery     **Renewing the Stuff of Life** Cynthia B. Cohen, 2007-06-25 In 1998 researchers learned how to isolate and culture embryonic stem cells which are only obtainable through the destruction of human embryos An ethical debate has raged since then about the ethics of this research usually pitting pro life advocates vs those who see the great promise of curing some of humanity's most persistent diseases In this important new book Cynthia Cohen agrees that we need to work toward a consensus on the issue of how we treat the embryo But more broadly she claims that we need to transform and expand the ethical and policy debates on stem cells both adult and embryonic This important and much needed book is both a primer and a means by which to understand the implications of this research     Catalog of Copyright Entries.
