twenty years the study of urban politics has shifted from a predominant concern with political culture and ethos to a
preoccupation with political economy particularly that of urban development Urban scholars have come to recognize that
cities are shaped by forces beyond their boundaries From that focus have emerged the views that cities are clearly engaged
in economic competition that market processes are shaped by national policy decisions sometimes intentionally and
sometimes inadvertently and that the costs and benefits of economic growth are unevenly distributed But what else needs to
be said about the policies and politics of urban development To supplement prevailing theories The Politics of Urban
Development argues that the role of local actors in making development decisions merits closer study Whatever the
structural constraints politics still matters Collectively the essays provide ample evidence that local government officials and
other community actors do not simply follow the imperatives that derive from the national political economy they are able to
assert a significant degree of influence over the shared destiny of an urban population The impact of the collection is to
