Development Of Language Processing Strategies:

The Development of Language Processing Strategies Reiko Mazuka, 2014-05-12 Ever since the notion of explanatory adequacy was promoted by Chomsky in his 1965 *Aspects* linguists and psycholinguists have been in pursuit of a psychologically valid theory of grammar To be explanatorily adequate a theory of grammar can not only describe the general characteristics of a language but can also account for the underlying psychological processes of acquiring and processing that language To be considered psychologically valid a grammar must be learnable by ordinary children the problem of acquisition and must generate sentences that are parsable by ordinary people the problem of processing Ultimately the fields of language acquisition and processing are concerned with the same goal to build a theory that accounts for grammar as it is acquired by children accessed in comprehension and production of speech and represented within the human mind Unfortunately these two fields developed independently and have rarely been well informed about each other's concerns Both have experienced past difficulties as a result Recently new models have been developed with full consideration to cross linguistic diversity Gone are many of the basic assumptions of conventional models and in their place a variety of innovative and more flexible assumptions have emerged However in their attempt to address cross linguistic issues these processing models have yet to fully address the developmental challenge How can a child without a stable grammar process language and still manage to acquire new grammar This book attempts to develop a model of language processing that addresses both cross linguistic and developmental challenges It proposes to link the setting of a basic configurational parameter during language acquisition to the different organization of processing strategies in left and right branching languages Based primarily on Mazuka's doctoral dissertation this volume incorporates various responses to the original proposal as well as the author's responses to the comments

Applying Theory and Research to Learning Japanese as a Foreign Language Masahiko Minami, 2007 Complex issues surround second language acquisition and foreign language learning in any language There is no doubt that individuals are capable of acquiring two or more languages at different stages of human development particularly in childhood Research investigating how adults acquire two languages also carries important insights into what takes place during later stages of human development From the fact that early and late bilinguals are faced with two languages in diverse stages of cognitive development we can predict differences in language processing between these two groups In the case of the Japanese language unfortunately far fewer studies particularly those written in English have been presented on foreign language learners and bilingual children Designed to address some of these gaps in the literature the chapters included in this book discuss various issues with regard to adult learners of Japanese as an L2 and English Japanese bilingual children This book provides the reader with an overview of the field of Japanese linguistics and its current concerns One of the main purposes of the book is to provide a forum in which to examine contributions in a variety of areas of Japanese linguistics to the teaching and learning of Japanese in the L2 classroom This book has at least two interrelated areas of benefit First both researchers and teachers benefit from each other TM s expertise and receive new insights that apply to their respective fields Second and more important the book

serves as a forum to promote ways in which we can apply linguistic theory to the learning of Japanese as an L2 That is what researchers have learned from both theory and practice can suggest what is important for the teaching of language conversely language educators have a great deal to offer linguists regarding the phenomenon of language Thus the goal of this book is to integrate theoretical concepts and empirical research findings in L2 development in order to apply them to educational practice

Foss,David T. Hakes,1978 **Second Language Reading and Vocabulary Learning** Thomas Huckin,Margot Haynes,James Coady,1993 Reading ability and vocabulary knowledge are two of the most important components of performance in a second language especially in academic settings Each depend on the other as vocabulary knowledge is the single most important factor in reading comprehension while reading is the single most important means by which intermediate and advanced learners acquire new words This symbiotic relationship is the subject of this volume The authors argue that building vocabulary through reading is a fruitful but complex activity that needs better understanding and more careful guidance This book is unique in its emphases on original research Eight of the 14 chapters are empirical studies published for the first time including classroom based case studies experimental research and think aloud protocol analysis In every chapter consideration is given to the pedagogical implications and possible applications of the research findings Lengthy editorial comments at the end of each chapter reinforce this practical concern
