## **Development And Perspectives Of Landscape Ecology:**

*Development and Perspectives of Landscape Ecology* O. Bastian, Uta Steinhardt, 2013-03-14 Development and status of landscape ecology subject of this book During the last decades landscape ecology has developed tremendously It concerns both the theoretical basis and practical application The roots of landscape ecology are geography and biology The term landscape ecology was first coined by the German scientist Carl Troll in 1939 since the development center of landscape ecology was in Central Europe Recently also other parts of the world became powerful centers of landscape ecology especially Northern America American approaches partly differ essentially from the European because they are focused especially on biogeography and population dynamics In Europe however the geographical roots of landscape ecology play a major role Landscape is defined as a complex of abiotic biotic and human components Mainly due to linguistic barriers the international discussion does not take notice of approaches and experiences from non anglophone countries in a sufficient manner Therefore this book considers more the German and European views on landscape ecology than the books which were published before It tries to bridge the gaps between theory and practice of landscape ecology as well between the German European and American approaches The book gives a fundamental representation of landscape ecology which proves to be a young but an interesting and very important transdisciplinary science for the solution of environmental problems Both the theoretical basis and practical application of landscape ecology are considered

**Landscape Perspectives** Marc Antrop, Veerle Van Eetvelde, 2017-12-19 Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept

Landscape Interfaces Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face

while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Pots chin Barbel Tress Tiina Peil Helen Soovali and Anu Printsman for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsman together with Piret Pungas thank you for technical help

*Ecological Landscape Design and Planning* Jala Makhzoumi, Gloria Pungetti, 2003-09-02 The authors of this book offer an holistic methodological approach to the design and planning of landscape based on both research and practical experience

**Landscape Ecological Analysis** Jeffrey M. Klopatek, Robert H. Gardner, 2012-12-06 Studies in landscape ecology focus on the effect of heterogeneity on ecosystem structure and function Vigorous growth in the field has included the development of methods and results that can be applied to an impressive range of environmental issues The purpose of this book is to provide the reader with a current perspective on this rapidly developing science This book features contributions by internationally renowned experts in the field that address a broad spectrum of political theoretical and applied aspects of the subject Chapters describe a number of methods and models that are used at landscape and regional scales within the context of ecosystem management to assess changes in biodiversity and to evaluate sustainable landscape planning for cultural as well as natural settings Also included are instructional models to assist in teaching

**Essentials of Landscape Ecology** Kimberly A. With, 2019-07-01 Human activity during the Anthropocene has transformed landscapes worldwide on a scale that rivals or exceeds even the largest of natural forces Landscape ecology has emerged as a science to investigate the interactions between natural and anthropogenic landscapes and ecological processes across a wide range of scales and systems from the effects of habitat or resource distributions on the individual movements gene flow and population dynamics of plants and animals to the human alteration of landscapes affecting the structure of biological communities and the functioning of entire ecosystems to the sustainable management of natural resources and the ecosystem goods and services upon which society depends This novel and comprehensive text presents the principles theory methods and applications of landscape ecology in an engaging and accessible format that is supplemented by numerous examples and case studies from a variety of systems including freshwater and marine scapes

[Complexity in Landscape Ecology](#) David G. Green, Nicholas I. Klomp, Glyn Rimmington, Suzanne Sadedin, 2020-07-02 This book examines key concepts and analytical approaches in complexity theory as it applies to landscape ecology including complex networks connectivity criticality feedback and self organisation It then reviews the ways that these ideas have led to new insights into the nature of ecosystems and the role of processes in landscapes The updated edition explores innovations in ecotechnology including

automated monitoring big data simulation and machine learning and shows how they are revolutionizing ecology by making it possible to deal more effectively with complexity Addressing the topic in a progression of ideas from small to large and from simple to sophisticated the book examines the implications of complexity for major environmental issues of our time particularly the urgencies of climate change and loss of biodiversity Understanding ecological complexity is crucial in today's globalized and interconnected world Successful management of the world's ecosystems must combine models of ecosystem complexity with biodiversity environmental geographic and socioeconomic data The book examines the impact of humans on landscapes and ecosystems as well as efforts to embed sustainability commerce and industrial development in the larger context of ecosystem services and ecological economics Well established as researchers in the field the authors provide a new perspective on current and future understanding of complexity in landscape ecology The new edition offers a non technical account of the topic so it is both accessible and informative for general readers For students of ecology it provides a fresh approach to classical ideas

History of Landscape Ecology in the United States Gary W. Barrett, Terry L. Barrett, Jianguo Wu, 2015-06-23 This book describes the emergence of landscape ecology its current status as a new integrative science and how distinguished scholars in the field of landscape ecology view the future regarding new challenges and career opportunities Over the past thirty years landscape ecology has utilized development in technology and methodology e.g. satellites GIS and systems technologists to monitor large temporal spatial scale events and phenomena These events include changes in vegetative cover and composition due to both natural disturbance and human cause changes that have academic economic political and social manifestations There is little doubt due to the temporal spatial scale of this integrative science that scholars in fields of study ranging from anthropology to urban ecology will desire to compare their fields with landscape ecology during this intellectually and technologically fertile time History of Landscape Ecology in the United States brings to light the vital role that landscape ecologists will play in the future as the human population continues to increase and fragment the natural environment Landscape ecology is known as a synthesized intersection of disciplines but new theories concepts and principles have emerged that form the foundation of a new transdiscipline
