*Assessing the Nation's Report Card* Chester E. Finn, 2022-08-23 Assessing the Nation s Report Card examines the history of the National Assessment of Educational Progress NAEP and outlines plans for improving and modernizing the organization Educational policy analyst Chester E Finn Jr imparts a rare inside analysis of the evolution of the NAEP program

at key moments in its history and provides a firsthand perspective of crucial decisions and core goals that have helped shape it. The result is a revealing survey of the US's most influential source of data on K-12 achievement. *Assessing the Nation's Report Card* offers readers an in-depth understanding and appreciation of NAEP as well as an examination of its shortcomings, its controversies, and its current issues. The book explores why NAEP is considered the gold standard of educational assessments yet is much lesser known than other types of standardized testing. Finn underscores the promise of applying the results in addressing achievement gaps, boosting federal accountability, and driving education reform and policy. He also discloses how the data are collected and what the results can and cannot tell us. For more than 50 years, this ambitious federal testing program has informed the decisions of policy makers and educational leaders as they advocate for educational improvements in the US. Acknowledging the nation's evolving need for actionable information about students and schools, Finn provides an assured and rare overview of the existing program and proposes possibilities for the future.

[Global Action on School Library Guidelines](#) Barbara A. Schultz-Jones, Dianne Oberg, 2015-06-16 This book celebrates the new IFLA School Library Guidelines and shows how the Guidelines can be used in improving school library services. Each chapter describes innovative initiatives for developing, implementing, and promoting school library guidelines. The book provides inspiration and guidance for the creation of national school library standards and for the development and use of standards and guidelines to change school library practice, to define the teaching role of school librarians, to guide the initial preparation of school librarians, and to advocate for school library services. Contributors to the book come from around the world: Australia, Canada, Ethiopia, France, Malaysia, Norway, Poland, Portugal, Spain, Sweden, and the United States. Their work illustrates the shared commitment of school librarians around the world to teaching and learning for all as envisioned in the IFLA UNESCO School Library Manifesto.

*Effectiveness of teachers' guides in the Global South* Benjamin Piper, Yasmin Sitabkhan, Jessica Mejia, Kellie Betts, 2018-05-10 This report presents the results of RTI International Education's study on teachers' guides across 13 countries and 19 projects. Using quantitative and qualitative methods, we examine how teachers' guides across the projects differ and find substantial variation in the design and structure of the documents. We develop a scripting index so that the scripting levels of the guides can be compared across projects. The impact results of the programs that use teachers' guides show significant impacts on learning outcomes associated with approximately an additional half year of learning, showing that structured teachers' guides contribute to improved learning outcomes. During observations, we find that teachers make a variety of changes in their classroom instruction from how the guides are written, showing that the utilization of structured teachers' guides does not create robotic teachers unable to use their own professional skills to teach children. Unfortunately, many changes that teachers make reduce the amount of group work and interactivity that was described in the guides, suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide. The report includes a set of research-based guidelines that material developers can use to

develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide
