Professor Amina Helmi,

Thursday 27th October 2022 at 5pm
(to be seated by 4.50pm)

Abstract:

Our understanding of the Milky Way and its constituents is undergoing a revolutionary change driven primarily by the Gaia space mission, and which is further reinforced when combined with spectroscopic surveys from the ground. In the Halley lecture, I will highlight a few of the results stemming from the analysis of the truly spectacular Gaia data releases. In particular, I will focus on the dynamics and history of the Milky Way, with special emphasis on what we have learned about its assembly thus far.
