

The background of the cover is a dark, high-contrast fluorescence micrograph. It shows a complex network of fine, green, thread-like structures, likely microtubules or actin filaments, radiating from a central point. In the center, there are two distinct, glowing structures. One is a bright green, roughly circular spot, and the other is a more elongated, blue and purple structure, possibly representing a nucleus or a specific organelle. The overall effect is that of a dynamic, molecular-level view of a cell's internal architecture.
