

10 Must-Know

OSHA Standards for Industrial Companies

Hazard Communication Standard

This standard applies to companies with production operations that use hazardous chemicals.

Emergency Action Plans

If you have over 10 employees, then you need to write an EAP that addresses all potential emergency scenarios.

Respiratory Protection

You must have a written respiratory program that employees are trained in. Additionally, annual fit testing must occur, and your facility need to be evaluated whenever operations change.

Electrical Wiring & Systems Design

As a part of this standard, you need to tag-out and remove from service all damaged equipment, maintain a 36-inch minimum clearance near each electrical panel, and more.

Powered Industrial Trucks

Applies to forklifts, cherry pickers, and any battery-operated pallet jacks. Employees must be trained and must wear seatbelts when operating powered industrial trucks.

Control of Hazardous Energy

Often referred to as "Lockout/Tagout"-You need to develop, document, implement, and enforce energy control procedures of equipment from sources of hazardous energy.

Personal Protective Equipment

Employers must provide PPE and ensure that it is used whenever necessary. This includes workplace assessment, employee training, and written certification.

Machinery & Machine Guarding

Requires that facilities review their equipment to make sure that proper protection is in place. Examples of safeguarding include barrier guards, 2-handed tripping devices, and electronic safety devices.

Toxic & Hazardous Substances

OSHA currently regulates approximately 400 substances, and has been focusing heavily on employees who may be exposed to hexavalent chromium and lead.

Hearing Conservation

The Noise Exposure standard establishes acceptable levels of noise that employees may be exposed to during their work shift.

Osha Safety Guidelines
