*Atomic and Molecular Spectroscopy* Rita Kakkar, 2015-05-14 Spectroscopy is the study of electromagnetic radiation and its interaction with solid liquid gas and plasma It is one of the widely used analytical techniques to study the structure of atoms and molecules The technique is also employed to obtain information about atoms and molecules as a result of their distinctive spectra The fast spreading field of spectroscopic applications has made a noteworthy influence on many disciplines including energy research chemical processing environmental protection and medicine This book aims to introduce students to the topic of spectroscopy The author has avoided the mathematical aspects of the subject as far as possible they appear in the text only when inevitable Including topics such as time dependent perturbation theory laser action and applications of Group Theory in interpretation of spectra the book offers a detailed coverage of the basic concepts and applications of spectroscopy

**Basic Atomic and Molecular Spectroscopy** John Michael Hollas, 2002 The main aim of this unique book is to introduce the student to spectroscopy in a clear manner which avoids as far as possible the mathematical aspects of the subject It is thus intended for first or second year undergraduates particularly those with minimal mathematics qualifications After explaining the theory behind spectroscopy the book then goes on to look at the different techniques such as rotational vibrational and electronic

spectroscopy It encompasses both high resolution structural and low resolution analytical spectroscopy demonstrating their close interrelationship The many worked problems make this book particularly appealing for independent study Visit [www.rsc.org/books/6674](http://www.rsc.org/books/6674) for further information Ideal for the needs of undergraduate chemistry students Tutorial Chemistry Texts is a major new series consisting of short single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses Each book provides a concise account of the basic principles underlying a given subject embodying an independent learning philosophy and including worked examples
