Burwick, 2001-05-23 This book examines what De Quincey called psychological criticism a mode of studying how literature of power arouses ideas and images dormant in the subconscious He explores this power by means of an introspective analysis of the effects produced in his own mind by reading Shakespeare and Milton Wordsworth and Coleridge Discussion of De Quincey s critical and narrative prose includes his skilled rewriting of a German forgery of a Waverly novel as well as such better known works as *Suspiria de Profundis* *Murder Considered* as one of the *Fine Arts* *On the Knocking at the Gate in Macbeth* *The English Mail Coach* and Wordsworth s *Poetry* New insight into each of these works is provided by drawing on a wealth of previously unpublished manuscripts *Is Divine Energy* Vipin Gupta, 2021 *Is Divine Energy* The

secret of the limitless immanent value is a profound explanation of why divine is a state of mind Our divinity is the impact we make through our conscious decisions We also reproduce transcendental divinity by para consciously letting our decisions be guided by a para entity s divine plan After that we seek to invest our divine energy to compensate for programmatic evolution guided behaviors and become a revolutionary servicing our supernatural impact What begins with a linear proportionality of each person s intrinsic divinity transforms into a nonlinear proportionality of the extrinsic divinity and motivates a parabolic proportionality of the person s present absolute divinity The infinity of microcosmic parabolic reactions constitutes a chaotic reality at the macrocosmic level The chaotic reality lets the first moving primordial entities enjoy a disproportionate conscious benefit of growth in their divinity The later evolving primeval entities suffer a disproportionate conscious cost of entropy in their divinity At any moment the present entity has a choice not to be either the evolved and constrained follower or the revolving and constraining leader A present entity may decide to be a freedom entrepreneur inspiring everybody to be the revolutionary and appropriate the entire evolutionary benefit of devoted followership of the perpetuating para deity oneself For avoiding the certainty of the survival of only the one who is free from the two dimensional present effect as the fittest we need to master the technique of responsibly managing the divine element Is Divine Energy highlights how by opening one s mind one may become free from the theory effect of a culturally binding primordial creator and the ideal effect of a consciousness binding absolute creature It demonstrates how each primeval creation of Mother Nature can enjoy the limitless transformations of the desired mood destiny divinity and eternity using the self as the immanent value It elegantly integrates and resolves grand challenges in a range of scientific disciplines and metaphysical discourses Dr Vipin Gupta has a Ph D in managerial science and applied economics from the Wharton School of the University of Pennsylvania He is a gold medalist from the Post graduate Program of the Indian Institute of Management Ahmedabad India He is a Professor of sensible management and appropriate science at the Jack H Brown College of Business and Public Administration California State University San Bernardino USA

Emerging Antimicrobials: Sources, Mechanisms of Action, Spectrum of Activity, Combination Antimicrobial Therapy, and Resistance Mechanisms John Osei Sekyere,Thamarai Schneiders,Piotr Majewski ,Amanda Claire Brown,2026-01-15 The rising prevalence of multidrug resistant MDR extensively drug resistant XDR and totally drug resistant TDR pathogens represents one of the most significant challenges in modern medicine Invasive infections caused by MDR and XDR pathogens are estimated to cause over 2 8 million infections and 35 000 deaths annually in the United States alone Globally the mortality rate for some invasive infections exceeds 50% The economic burden is also staggering with drug resistant infections costing the U S healthcare system more than 4 6 billion annually Antibiotics which are critical to modern medicine play an essential role in treating bacterial infections such as pneumonia sepsis tuberculosis

and urinary tract infections as well as preventing infections in surgical procedures and during cancer chemotherapy Without effective antibiotics these treatments and surgeries would become significantly more dangerous leading to increased morbidity mortality and healthcare costs The growing resistance of pathogens to most or all existing antimicrobial agents underscores the urgent need for innovative solutions to prevent a potential post antibiotic era where even routine infections could become untreatable Currently treatment and prophylaxis pipelines primarily rely on existing drug classes and their derivatives This dependence has resulted in a limited arsenal of effective therapeutic options posing a significant challenge in clinical practice This issue is particularly critical for infections caused by fungal pathogens mycobacteria and Gram positive and Gram negative bacteria Consequently the emergence of MDR XDR PDR pan drug resistant and TDR pathogens severely limits treatment options for infections caused by these organisms
