**Alcohol Related Problems** Neville Krasner, J. S. Madden, Robin J. Walker, 1984-01-01      **Research Advances in Alcohol and Drug Problems** H.M. Annis, H.D. Cappell, F.B. Glaser, M.S. Goodstadt, L.T. Kozlowski, 2013-11-11 This is the tenth volume in the Research Advances series and the seventh published by Plenum Press Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol illicit drugs and tobacco We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution Two of the chapters are decidedly longer than the others very long chapters have appeared occasionally in the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews Again the editorial board has changed After several years of service Reginald G Smart has stepped down New to the board are Helen M Annis Michael S Goodstadt Lynn T Kozlowski and Evelyn R Vingilis This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies Rutgers University      **Alcohol and the Public Health** John Kemm, 1991-04-10 Alcohol consumption and alcohol induced social and health problems are fast increasing while safe intake levels are revised downwards Result a resurgence of concern This authoritative balanced and factual book is for social workers community nurses health visitors midwives GP's community and religious leaders politicians police voluntary and action groups schools and teachers and of course those in the drinks trade Most importantly it applies to those at risk their families and carers Free from medical jargon loaded with diagrams graphs and tables it dissects and informs without mystifying or judging An extremely lucid and competent piece of work Dr Martin Plant Alcohol Research Group University of Edinburgh      Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70      **Main Issues in Mental Health and Race** Dele Olajide, David Ndegwa, 2019-06-04 This title was first published in 2003 This work arose out of the editors concerns at the British preoccupation with an alleged epidemic of schizophrenia in people of African descent Black people in contact with psychiatric services are commonly classed as schizophrenic or normal and do not seem to attract any of the diagnoses or interventions which their white counterparts do The editors asked contributors to carry out a critical broad based review of a particular area using the technology that has been developed for conducting systematic literature reviews The areas explored were selected by the editors from their own understanding of disciplines which might have something to contribute They were largely disciplines which have an interest in beliefs feelings emotions thought politics language and decision making In some areas there was little material available from literature searches so the reviewers used their own understanding of the subject matter rather than existing literature to write critical essays      *Management of Drinking Problems* Peter Anderson, World Health Organization. Regional Office for Europe, 1990 Presents a strategy for prevention and management of alcohol problems in primary care Examines the part played by alcohol in communities and individuals lives

and discusses social encouragements and discouragements to drinking Suggests a structure for ascertaining and categorizing alcohol related risks for individuals seen in primary care and ways of informing advising and helping people in different categories

**Community Psychiatry** Douglas H. Bennett, Hugh Lionel Freeman, 1991 This work presents psychiatry as essentially a branch of medicine looking at the subject from the standpoint of scientific investigation rather than from an ideological or idealistic one The topics covered range from a psychosocial view of depression to residential care

**Alcohol Education** David J. Hanson, 1996-11-30 In spite of a massive national investment in alcohol education the evidence clearly demonstrates that our current efforts are overwhelmingly ineffective and are often counterproductive The assessment of the effectiveness of alcohol programs over the past 15 years reveals that those based on the responsible use approach tend to be superior to those based on the abstinence approach Hanson puts the historical relationship between Americans and alcohol into perspective discusses federal policies on alcohol that are highly ideological and biased and advocates the development of responsible use curricula that will prepare students to be as adults responsible consumers of alcohol While alcohol has been praised as a sign of refinement a source of relaxation and a complement to good times it has also been cursed as the cause of disease and death The temperance movement which taught that alcohol was poison and that moderation in its use was no more possible than moderation in murder has greatly influenced American thought and is reflected in our abstinence oriented approach to alcohol education Current programs reflect not only these abstinence origins but the inclusion of drug education several decades ago Hanson finds that despite good intentions evidence indicates that this approach has proved ineffective He considers the strong and often mixed feelings Americans have toward alcohol that are reflected in ever changing public policy and concludes that the development and evaluation of alcohol education programs should be based on the best scientific evidence available rather than on political ideology Recommendations for change in alcohol education are presented with the most important being that we must promote the development and evaluation of diverse responsible use curricula with the goal of reducing alcohol abuse
