Modern Trends in Diatom

Identification Gabriel Cristóbal, Saúl Blanco, Gloria Bueno, 2020-05-28 High resolution images of phytoplankton cells such as diatoms or desmids which are useful for monitoring water quality can now be provided by digital microscopes facilitating the automated analysis and identification of specimens Conventional approaches are based on optical microscopy however manual image analysis is impractical due to the huge diversity of this group of microalgae and its great morphological plasticity As such there is a need for automated recognition techniques for diagnostic tools e.g. environmental monitoring networks early warning systems to improve the management of water resources and decision making processes Describing the entire workflow of a bioindicator system from capture analysis and identification to the determination of quality indices this book provides insights into the current state of the art in automatic identification systems in microscopy

Introduction to Cell and Tissue Culture Jennie P. Mather, Penelope E. Roberts, 2007-08-20 It is a pleasure to contribute the foreword to Introduction to Cell and Tissue Culture Theory and Techniques by Mather and Roberts Despite the occasional appearance of thoughtful works devoted to elementary or advanced cell culture methodology a place remains for a comprehensive and definitive volume that can be used to advantage by both the novice and the expert in the field In this book Mather and Roberts present the relevant methodology within a conceptual framework of cell biology genetics nutrition endocrinology and physiology that renders technical cell culture information in a comprehensive logical format This allows topics to be presented with an emphasis on troubleshooting problems from a basis of understanding the underlying theory The material is presented in a way that is adaptable to student use in formal courses it also should be functional when used on a daily basis by professional cell culturists in academia and industry The volume includes references to relevant Internet sites and other useful sources of information In addition to the fundamentals attention is also given to modern applications and approaches to cell culture derivation medium formulation culture scale up and biotechnology presented by scientists who are pioneers in these areas With this volume it should be possible to establish and maintain a cell culture laboratory devoted to any of the many disciplines to which cell culture methodology is applicable
