Against Life Alastair Hunt, Stephanie Youngblood, 2016-03-15 The contributors to *Against Life* think critically about the turn to life in recent theory and culture Editors Alastair Hunt and Stephanie Youngblood shape their collection to provocatively challenge the assumption rife throughout the humanities that life needs to be cultivated affirmed and redeemed The editors and their contributors explore how we might be better off daring to think ethics and politics as well as the project of the humanities in more radical terms as a refusal to choose life What forms of equality and freedom might emerge if we did not organize being together under signs of life Taken together the essays in *Against Life* mark an important turn in the ethico political work of the humanities

A Death of the World Harris B. Bechtol, 2025-04-01 *A Death of the World* offers a phenomenological description of what happens to the world for those who survive the death of someone Bringing Jacques Derrida s works into conversation with the philosophies of Martin Heidegger Emmanuel Levinas Jean Luc Marion Maurice Blanchot and Claude Romano the poetry and literature of Paul Celan W H Auden Emily Dickinson Ovid and Jonathan Safran Foer and psychological works concerning trauma mourning epigenetics and memory author Harris B Bechtol provides interdisciplinary language for understanding the death of the other as an event He argues that such death must be understood as an event because this death is more than just the loss of the other who has died insofar as the meaning of the world to and with this other is also lost Such loss manifests itself through the transformations of both the spaces in which meaning takes place and the lived time of a survivor s world These transformations of the world culminate in his account of workless mourning which establishes the contours of the life after these deaths of the world

The Life of Metrical and Free Verse in Twentieth-Century Poetry Jon Silkin, 2016-07-27 In a wide ranging and compelling account of the life of metrical and free verse in the twentieth century poet and critic Jon Silkin deepens our understanding of the way poetry works on us He begins from the premiss that two modes of verse free and metrical engage the creative energies of poetry now creating a rich fertile environment capable of yielding work valuable to

poetry itself and to the society which has given it life With a practitioner s empathy Silkin reads the poetry of Whitman Hopkins Eliot Pound Lawrence Dylan Thomas Bunting and eight British poets from the post second World War period to illustrate how free and metrical verse create separately or together a poetic harmony Additionally he includes crucial statements on modern poetry from poets themselves concluding with a fine memoir of Basil Bunting by Connie Pickard published in book form for the first time

Sexual Identity and Lesbian Family Life Iris Erh-Ya Pai,2017-07-11 This new book illustrates how Taiwanese lesbians negotiate their lives outside patriarchal families while seeking varying ways to maintain working relationships with their families of origin as their notion of family distinguishes them from same sex couples in other countries This ambivalence has a strong influence on their relational decisions as they deal with contradictions between family ties filial piety and lesbianism Based on individual and couple interviews with self identified lesbian couples in stable relationships the book offers vivid narratives of different ways in which Taiwanese lesbians have been able to make sense of their families without recognition by legislation or their families of origin Specific issues in Taiwan raised in the book challenge the taken for granted understandings of same sex relationships and review the dramatic transformations that have profoundly changed womens position It also offers a sensitive analysis of GLBT issues and heteronormativity arguing that Chinese familialism can cohabite with lesbianism in the context of contemporary Taiwan

Reading Typographically Geoffrey Turnovsky,2024-06-18 Anxieties about the fate of reading in the digital age reveal how deeply our views of the moral and intellectual benefits of reading are tied to print These views take root in a conception of reading as an immersive activity exemplified by the experience of losing oneself in a book Against the backdrop of digital distraction and fragmentation such immersion leads readers to become more focused collected and empathetic How did we come to see the printed book as especially suited to deliver this experience Print based reading practices have historically included a wide range of modes not least the disjointed scanning we associate today with electronic text In the context of religious practice literacy s benefits were presumed to lie in such random access retrieval facilitated by indexical tools like the numbering of Biblical chapters and verses It was this didactic hunt and peck reading that bound readers to communities Exploring key evolutions in print in 17th and 18th century France from typeface print runs and format to punctuation and the editorial adaptation of manuscript and oral forms in print this book argues that typographic developments upholding the transparency of the printed medium were decisive for the ascendancy of immersive reading as a dominant paradigm that shaped modern perspectives on reading and literacy
