British Aeroplanes Before The Great War:

British Aircraft Before the Great War Michael H. Goodall, Mike Goodall, 2001 For the very first time the history of British pre World War I aircraft has been gathered together in one volume with more than 900 of them well illustrated This new book constitutes a most valuable contribution about a remarkable period in aviation history and is a memorial to the bravery and inventiveness of the intrepid pioneers of that far off era Among the many famous manufacturer s covered are Avro Sopwith Shorts and Bristol Many lesser known designers and builders such as Martin Handasyde and Howard Wright are also given ample coverage

French Aeroplanes Before the Great War Leonard E. Opdycke, 1999 French Aeroplanes Before the Great War is a catalog of the aeroplanes of the nearly 700 French builders who worked before the onset of World War I Most of these aeroplanes flew some did not some were never even finished but all of them reflect the extraordinary vitality and sense of optimism that powered the aeronautical world before the future of the aeroplane began to become clearer in wartime If the Wrights had not flown in 1903 one of the early French builders would very quickly have won the laurels for the first flight Some of the machines appear in these pages probably for the first time in print others are rarely seen This collection serves as a kind of super Exposition Internationale de Locomotion Arienne readers are invited to enter the Grand Palais as they might have in 1908 or 1909 to enjoy these marvelous aircraft

Alexander P. de Seversky and the Quest for Air Power James K. Libbey, 2013-08-31 Today air power is a vital component of the U S armed forces James Libbey in Alexander P de Seversky and the Quest for Air Power highlights the contributions of an aviation pioneer who made much of it possible Graduating from the Imperial Russian Naval Academy at the start of World War I de Seversky lost a leg in his first combat mission He still shot down thirteen German planes and

became the empire's most decorated combat naval pilot. While serving as a naval attaché in the United States in 1918, de Seversky elected to escape the Bolshevik Revolution and offered his services as a pilot and consulting engineer to the U.S. War Department. He proved inventive both in the technology of advanced military aircraft and in the strategy of exercising air power. He worked for famed aviation advocate Gen. William Billy Mitchell, who encouraged the naturalized citizen to patent his inventions, such as an in-flight refueling system and a gyroscopically synchronized bombsight. His creative spirit then spurred him to design and manufacture advanced military aircraft. When World War II broke out in Europe, de Seversky became America's best-known philosopher, prophet, and advocate for air power, even serving as an adviser to the chief of staff of the U.S. Air Force. The highlight of his life occurred in 1970 when the Aviation Hall of Fame enshrined de Seversky for his achievements as a pilot, aeronautical engineer, inventor, industrialist, author, strategist, consultant, and scientific advances in aircraft design and aerospace technology. This book will appeal to readers with a special interest in military history and to anyone who wants to learn more about American air power's most important figures.
