British Camera Makers:

British Camera Makers Norman Channing, Mike Dunn, 1996 **The Optician and Scientific Instrument Maker**, 1925 **Motion Picture Photography** H. Mario Raimondo-Souto, 2014-11-18 In 1891 William Dickson a researcher at Thomas Edison's firm developed the Kinetograph a motion picture camera that used Eastman Kodak's new celluloid film. Almost immediately an industry was born. The new artistic and technical discipline of motion picture photography matured as the film industry grew. From the beginnings of the movie camera developments in film production and exhibition have been inextricably linked to the evolution of motion picture photography. This work traces the history of motion picture photography from the late 19th century through the year 1960 when color photography became the accepted standard. Generously illustrated it covers each decade's cameras, lenses, cameramen, film processing methods, formats, studios, lighting techniques and major cinematographic developments. Each chapter concludes with examples of the decade's outstanding cinematography. Instructors considering this book for use in a course may request an examination copy here.

Encyclopedia of Nineteenth-Century Photography John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century. It sets out to be the standard definitive reference work on the subject for years to come. Its coverage is global, an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication. The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena. Coverage includes all the key people, processes, equipment, movements, styles, debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool, creative medium and recorder of everyday life which it had become by the dawn of the twentieth century. The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics, students, researchers and libraries worldwide. **From Refugee to Obe** Charles G. Strasser, 2012-12-20 The Life of Charles Gad Strasser is well captured in the title From Refugee to OBE. The reader will find not only a passionate personal story of one man's climbing of the mountain but also an important historical rendition from war-torn Europe to the flourishing industries and institutions which have contributed to our current prosperous world. Charles Strasser fled from his native Czechoslovakia when he was eleven in 1938, just barely in advance of the Nazi war machine. Six years later he joined the allied armies and participated in the final victory. Before his twenty-fifth birthday he founded a company that would employ hundreds and have an international scope with ties to Germany, Japan and many developing countries. While he excelled in business, it was for his many humanitarian services that he was awarded the distinction Officer of the Order of the British Empire. He received his OBE from Her Majesty the Queen at an investiture in Buckingham Palace. The reader is invited to come along with Charles Strasser on his exciting journey from refugee to OBE.
