British Moralists And The Internal Ought:

The British Moralists and the Internal "ought": 1640-1740 Stephen Darwall,1995 [The British Moralists and the Internal 'Ought'](#) Stephen L. Darwall,1995-04-28 This book is a major work in the history of ethics and provides the first study of early modern British philosophy in several decades Professor Darwall discerns two distinct traditions feeding into the moral philosophy of the seventeenth and eighteenth centuries On the one hand there is the empirical naturalist tradition comprising Hobbes Locke Cumberland Hutcheson and Hume which argues that obligation is the practical force that empirical discoveries acquire in the process of deliberation On the other hand there is a group including Cudworth Shaftesbury Butler and in some moments Locke which views obligation as inconceivable without autonomy and which seeks to develop a theory of the will as self determining [Rights: Concepts and Contexts](#) Horacio Spector,2017-05-15 [Rights Concepts and Contexts](#) contains the central works of recent scholarship on the nature of rights with contributions by some of the most prominent contemporary theorists in moral legal and political philosophy including Joseph Raz Robert Alexy Jeremy Waldron Morton Horwitz Stephen Darwall Margaret Gilbert David Lyons and Aharon Barak With approaches ranging from the political to the historical and from the analytical to the critical this collection touches on the major conceptual and practical questions of this important field what is the nature and grounding of human rights How should conflicts of rights best be analyzed Are rights best understood in terms of choice benefits or some hybrid of the two What are the connections between rights and duties and between rights and justice The collection also offers useful introductions to emerging issues in rights theory such as the purported bipolarity of rights **The Project of Positivism in International Law** Mónica García-Salmones Rovira,2013-11 This book analyses international legal positivists desire to emulate the success of the empirical methods applied in the biological and physical sciences their wish to work with law with the certainty that natural facts started to provide as the natural sciences method developed [PREFACE](#) [The Cambridge Companion to Berkeley](#) Kenneth Winkler,2005-12-19 George Berkeley is one of the greatest and most influential modern philosophers In defending the immaterialism for which he is most famous he redirected modern thinking about the nature of objectivity and the mind s capacity to come to terms with it Along the way he made striking and influential proposals concerning the psychology of the senses the workings of language the aim of science and the scope of mathematics In this Companion volume a team of distinguished authors not only examines Berkeley s achievements but also his neglected contributions to moral and political philosophy his writings on economics and development and his defense of religious commitment and religious life [After Injury](#) Ashraf H.A. Rushdy,2018-05-01 [After Injury](#) explores the practices of forgiveness resentment and apology in three key moments when they were undergoing a dramatic change The three moments are early Christian history for forgiveness the shift from British eighteenth century to Continental nineteenth century philosophers for resentment and the moment in the 1950s postwar world in which British ordinary language philosophers and American sociologists of everyday life theorized

what it means to express or perform an apology The debates that arose in those key moments have largely defined our contemporary study of these practices

British Moralists Sir Lewis Amherst Selby-Bigge,1897 *Love, Self-Deceit and Money* Koen Stapelbroek,2008-04-05 Love drives and gives life to the commerce of mankind Thus the sixteen year old Ferdinando Galiani 1728 1787 presented his project to understand the sociable nature of man This observation a reflection of his own position on the relation between trade and virtue hinted at what the mature works of Galiani one of the most noteworthy economists and wits in eighteenth century Italy would eventually yield In *Love Self Deceit and Money* Koen Stapelbroek reconstructs the Early Neapolitan Enlightenment debate on the morality of market societies a debate that hinged on the preservation of Naples independent statehood in a global arena of commercial and military competition Galiani rejected the moralizing and mercantile ideas of his contemporaries regarding the dangers threatening Naples and in his *Della moneta* 1751 he justified the systems set in place by the Neapolitan government With reference to early previously unstudied lectures on self deceptive Platonic love Koen Stapelbroek examines Galiani s role in the wider debate arguing that his early moral philosophical and historical work suggests a great deal about his political economic stance including his assertion that money is the ultimate ordering principle in the universe As a study of one of the most idiosyncratic minds of the Enlightenment period *Love Self Deceit and Money* shows how diverse ideas of the development of individual passions into social dispositions commerce and reform politics dovetailed seamlessly in the intellectual climate of eighteenth century Europe
