Naval Power and British Culture, 1760-1850 Roger Morriss, 2017-05-15 Recent work on the growth of British naval power during the eighteenth and nineteenth centuries has emphasised developments in the political, constitutional and financial infrastructure of the British state. *Naval Power and British Culture 1760-1850* takes these considerations one step further and examines the relationship of administrative culture within government bureaucracy to contemporary perceptions of efficiency in the period 1760-1850. By administrative culture is meant the ideas, attitudes, structures, practices and mores of public employees. Inevitably these changed over time and this shift is examined as the naval departments passed through times of crisis and peace. Focusing on the transition in the culture of government employees in the naval establishments in London in the Navy and Victualling Offices as well as the victualling yard towns along the Thames and Medway, *Naval Power and British Culture 1760-1850* concerns itself with attitudes at all levels of the organisation. Yet it is concerned above all with those whose views and conduct are seldom reported: the clerks, artificers, secretaries and commissioners, those employees of government who lived in local communities and took their work experience back home with them. As such, this book illuminates not only the employees of government but also the society which surrounded and impinged upon naval establishments and the reciprocal nature of their attitudes and influences.

The Transformation of British Naval Strategy James Davey, 2012 Shows how the system of supply was perfected during the later part of the Napoleonic Wars, enabling fleets to stay at sea on a permanent basis. After the Battle of Trafalgar, the navy continued to be the major arm of British strategy. Decades of practice and refinement had rendered it adept at executing operations: fighting battles, blockading and convoying across the globe. And yet as late as 1807, fleets were forced from their stations due to an ineffective provisioning system. *The Transformation of British Naval Strategy* shows how sweeping administrative reforms enacted between 1808 and 1812 established a highly effective logistical system, changing an ineffective supply system into one which successfully enabled a fleet to remain on station for as long as was required. James Davey examines the logistical support provided for fleets sent to Northern Europe during the Napoleonic War and shows how this new supply system successfully transformed naval operations, enabling the navy to pursue crucial objectives of national importance: protect essential exports and imports and attack the economies of the

Napoleonic Empire The Transformation of British Naval Strategy is a detailed study of national policy administrative and political reform and strategic viability It delves into the nature of the British state its relationship with the private sector and its ability to reform itself in a time of war Bureaucratic restructuring represented the last stage in a century long process of logistical improvement As a result of the reforms the navy was able to conduct operations beyond the realms of possibility even twenty years earlier and saw the reach of its power transformed Military and Napoleonic historians will find this book invaluable JAMES DAVEY is Research Curator at the National Maritime Museum and Visiting Lecturer at the University of Greenwich where he teaches British naval history

The Professions in Early Modern England Wilfrid Prest,2023-08-18 First published in 1987 The Professions in Early Modern England highlights the significant role of professional and quasi professional occupations in English society before the industrial revolution contrary to what was once historiographical and sociological orthodoxy The editorial introduction provides an overview of the history of the professions as a distinct field of scholarly investigation suggesting that neither historians nor social theorists have adequately mapped or explained the rise of the professions to their present place in modern societies The following chapters bring together original contributions by researchers who have made a close study of various occupational groups over the period c 1500 1750 Besides the traditional learned professions and their practitioners in the church medicine and the law they survey occupations generally lacking institutional coherence school teachers estate stewards and those following the profession of arms This book remains of interest to students of history literature and sociology
