British Railway Atlas 1955 Ian Allan Ltd, Ian Allan Publishing, 2000 The compilers of this new atlas have delved through the records to provide a comprehensive railway atlas covering the state of Britain's railways in January 1955 at the dawn of the modernisation era **British Railways Atlas 1947** Ian Allan (Firm), 1996 Originally published in 1948 as a permanent record of the British railway system as it was at the end of private ownership this book is a graphic reminder of the scale of the railway industry in the period before nationalisation [British Railways Atlas 1947](#) Ian Allan, Ian Allen Publishing, 2011-04-07 Available for the first time in hardback **British Railways Atlas 1947 The Last Days of the Big Four** helps to recall a long lost era when railways were still the dominant form of transport for both passengers and freight all over the country Originally published in 1948 as a permanent record of the British railway system as it was at the end of private ownership in December 1947 **British Railways Atlas 1947** is a graphic reminder of the scale of the railway industry in the period before Nationalisation Each of the lines of the Big Four railway companies is differentiated by a colour Great Western yellow London Midland Scottish red London North Eastern blue and Southern green Also shown are the myriad minor railways that had managed to maintain their independence after the Grouping of 1923 but which were to disappear along with their larger neighbours into the new British Railways lines such as the Kent East Sussex and the East Kent which had jealously guarded their independence were to be swallowed up This reprint of the ever popular Rail Atlas comes back bigger and better than before and of course in Hard back for the first time ever **British Railways Atlas** Michael G. which the railways transformed Britain by the scale of their engineering works by shrinking national space and reorganising the layouts of urban areas Maps show the evolution of early wagon routes into the first railway routes the frenetic activity of the Railway Mania years and the consolidation of these lines into a national network This exciting presentation of railway development will interest the enthusiast as well as the more general student of British transport history *Rail Atlas Great Britain and Ireland* Stuart K. Baker, 2010 The latest edition of the famous Baker Rail Atlas is now completely revised and updated to include all the latest developments and changes to the rail system in Great Britain and Ireland To the railway enthusiast fraternity Baker's Rail Atlas is the Bible The book portrays the entire railway network of the British Isles differentiating between passenger and freight lines as well as between single and multitrack sections The book also shows preserved lines freight terminals LRT schemes passenger stations lines under construction proposed lines and depots This new edition reflects the developments in railway and LRT infrastructure due for completion by 2010 as well as those currently under development These projects include all of the railway investment linked into the 2012 Olympic Games continued expansion of the British West Coast main line significant numbers of new railway stations the completion of a number of projects in Scotland and much more *Pre-Grouping Atlas and RCH Junction Diagrams* Ian Allan Publishing, 2014-10-16 Following the popularity of other historical railway atlases this is an enlarged edition of the Pre Grouping Atlas combined with the Railway Clearing House Junction Diagrams The pages show a map of the British railway network for a particular region immediately prior to the 1923 grouping showing the owners of the line and each map will be accompanied detailed drawings published by the Railway Clearing House in 1914 of the junctions within that region *Rail Atlas 1970* Hardb, 2003 In 1963 the then Chairman of the British Railways Board Dr later Lord Richard Beeching produced his report on the future structure of the railway industry Innocuously entitled *The Reshaping of Britain's Railways* the report was to become one of the most controversial documents ever produced on a major British industry and 40 years on still represents one of the defining moments of Britain's railway history Tasked by the government with reducing the ever increasing losses suffered by the railway industry Beeching's response was to take a root and branch analysis of each line that was still operational the result was the infamous axe the proposal to close vast swathes of the railway network thereby creating vast areas that were no longer served by rail Although there were more positive aspects to the report such as the emphasis on bulk freight traffic it was the closure programme that most people and especially railway enthusiasts remember most From 1964 onwards the railways contracted rapidly even the election of a new Labour Government in 1964 failed to stem the flow of closures but by 1970 the majority of closures scheduled by Beeching had occurred The early 1970s however did witness further limited closures as many of the lines which had been reprieved earlier such as the lines serving much of east Lincolnshire succumbed In the second of Ian Allan Publishing's new series of historical railway atlases the year 1970 comes under the spotlight Taking 1 May 1970 as the cut off the book provides a graphic portrait of the railway network as it

existed after the wholesale closures of the 1960s In 45 full colour maps along with a comprehensive index the user is provided with an interesting snapshot of the railway industry at the time For many it will be illuminating to see how many routes survived the Beeching era only to succumb in the period after 1970 routes such as those to Bridport lifracombe Swanage and Minehead all feature as passenger routes while others such as the branch to Hemyock continued to eke out their existence as freight only lines British Rail Atlas Ian Allan Publishers,1967 *Railway Atlas Then and Now* Paul Smith,Keith Turner,2012-08 Provides historical and present day maps alongside each other for direct then and now comparison On each double page spread the first map records the railway industry as it existed in 1923 pre Grouping whilst the right hand page shows it as it exists today The book includes 45 maps from each period making a total of 90 pages of mapping in all alongside a detailed gazetteer and brief introduction The present day maps include information about the railway lines that have been closed and converted into either walking or cycling routes Other information given includes the location of all steam sheds and current diesel depots Back cover **British Railways Pre-grouping Atlas and Gazetteer** ,1961 *British Railways Pre-grouping Atlas and Gazetteer* Railway Publications, ltd,1997-03-27 First published in 1967 as a fifth edition of the original 1958 production this is a welcome reprint of this useful reference source last reprinted in 1998 The whole railway system as it existed in the years prior to 1923 are shown with routes in colour coded format on 45 pages of maps Locations of tunnels locomotive sheds works and other features are included
