

# DIRECT VS CIRCUMSTANTIAL EVIDENCE

## DIRECT

Direct evidence is a type of evidence that, if true, directly proves a fact without requiring any inference or presumption. This could include eyewitness testimony, video or audio recordings, or a written confession, which gives straightforward proof or disproof of a fact. It is seen as more reliable than circumstantial evidence.

## CIRCUMSTANTIAL

Circumstantial evidence is indirect evidence that implies something occurred but does not directly prove it. It requires inference and reasoning to connect the evidence to a specific conclusion or event. It is therefore seen as less reliable as standalone evidence, but can be used to contribute to building a case.
