[China's Eco-city Construction](#) Jingyuan Li,Tongjin Yang,2015-11-04 This book introduces the concept of Eco civilization highlights the

construction and development of eco cities in China and assesses the achievements and shortcomings of China's eco city construction projects. As both China and Western countries face an impending ecological crisis, responding to that crisis is a common challenge for all human beings. There is an overwhelming consensus among Chinese scholars that in order to successfully address the ecological crisis, we must establish an eco civilization, and one important step toward accomplishing that goal is to plan and construct eco cities.

Metropolitan Landscapes Antonella Contin, 2021-08-24. This edited volume covers many aspects of the Metropolitan Landscapes. Solutions are needed to meet the demand of the citizens of a renewed metropolitan region landscape. It opens up discussions about possible toolkits for strategic actions based on understanding the territory from geographical, urban, architectural, economic, environmental, and public policy perspectives. This book intends to promote the Metropolitan dwelling quality, ensuring human well-being, proposing a discussion on the resilient articulation of the interface space among the city's infrastructure, agriculture, and nature. This book results from the Symposium Metropolitan Landscapes that MSLab of the Politecnico di Milano and ETSA Sevilla organized at the IALE 2019 Conference Milan July 2019 to manage radical territory transformation with a strategic vision. The widespread growth of urban areas indicates the importance of building resilient, sustainable cities capable of minimizing climate change impact production. The Symposium aimed to discuss the Urban Metabolism approach, considering the combination of Landscapes set in a single Metropolitan Ecosystem. Accordingly, new design strategies of transformation, replacement, or maintenance can compose Urban Rural Linkage patterns and a decalage of different landscape contexts. Ecological interest in environmental sustainability, compatibility, and resilience is not tied exclusively to the balance between production and energy consumption. Thus, it is the integration over time and at several scales of the urban and rural landscapes and their inhabitants that nourish the Metropolitan Bioregion. Moreover, the Metropolitan Landscape Book's research hypothesis is the need for a Glossary strengthening the basis of understanding Metropolitan Landscape's complexity. This book's topic is particularly relevant to Landscape Urbanism, Architecture, Urban disciplines, Scholars, Students, and Practitioners who want to be connected in a significant way with Metropolitan Discipline's research field.

Greening the City Dorothee Brantz, Sonja D mpelmann, 2011-07-01. The modern city is not only pavement and concrete. Parks, gardens, trees, and other plants are an integral part of the urban environment. Often the focal points of social movements and political interests, green spaces

represent far more than simply an effort to balance the man made with the natural A city s history with and approach to its parks and gardens reveals much about its workings and the forces acting upon it Our green spaces offer a unique and valuable window on the history of city life The essays in Greening the City span over a century of urban history moving from fin de si cle Sofia to green efforts in urban Seattle The authors present a wide array of cases that speak to global concerns through the local and specific with topics that include green space planning in Barcelona and Mexico City the distinction between public and private nature in Los Angeles the ecological diversity of West Berlin and the historical and cultural significance of hybrid spaces designed for sports The essays collected here will make us think differently about how we study cities as well as how we live in them Contributors Dorothee Brantz Technische Universit t Berlin Peter Clark University of Helsinki Lawrence Culver Utah State University Konstanze Sylva Domhardt Swiss Federal Institute of Technology Zurich Sonja D mpelmann University of Maryland Zachary J S Falck Independent Scholar Stefanie Hennecke Technical University Munich Sonia Hirt Virginia Polytechnic Institute and State University Salla Jokela University of Helsinki Jens Lachmund Maastricht University Gary McDonogh Bryn Mawr College Jarmo Saarikivi University of Helsinki Jeffrey Craig Sanders Washington State University Municipal Manual of the City of Detroit ,1922 Annual Report of the Municipal Civil Service Commission of the City of New York Civil Service Commission of the City of New York,1898
