**City** Douglas W. Rae, 2008-10-01 How did neighborhood groceries parish halls factories and even saloons contribute more to urban vitality than did the fiscal might of postwar urban renewal With a novelist s eye for telling detail Douglas Rae depicts the features that contributed most to city life in the early urbanist decades of the twentieth century Rae s subject is New Haven Connecticut but the lessons he draws apply to many American cities **City Urbanism and Its End** begins with a richly textured portrait of New Haven in the early twentieth century a period of centralized manufacturing civic vitality and mixed use neighborhoods As social and economic conditions changed the city confronted its end of urbanism first during the Depression and then very aggressively during the mayoral reign of Richard C Lee 1954 70 when New Haven led the nation in urban renewal spending But government spending has repeatedly failed to restore urban vitality Rae argues that strategies for the urban future should focus on nurturing the unplanned civic engagements that make mixed use city life so appealing and so civilized Cities need not reach their old peaks of population or look like thriving suburbs to be once again splendid places for human beings to live and work
