Mumbai and Tokyo cities are home to half the planet's population and consume nearly three quarters of its natural resources. They can be seen as natural cultural artifacts, evidence of our civic spirit and collective ingenuity. This book gives us the ecological and functional context of how cities evolved throughout human history: the connection between pottery making and childbirth in ancient Anatolia, plumbing and politics in ancient Rome, and revolution and street planning in nineteenth century Paris. This illuminating study helps us to understand how urban centers thrive, decline, and rise again, and prepares us for the role cities will play in the future. A superb historical account of the places in which most of us either live or will live. Conde Nast Traveller **Bibliographic Guide to Maps and Atlases**, 2003 Time, 2003 **Fodor's Spain 2004**
