dimensions of CSO governance by opening new avenues on democracy First the work of Ostrom about governing the commons provides us new insights to think community self governance Second the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance Third the concepts of substantive rationality and economy proposed respectively by Ramos and Polanyi reframe the context in which the question can be addressed Lastly this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an international audience of researchers and policy makers

Civil Society and World Regions Lorenzo Fioramonti, 2013-12-11 Supranational regionalism and regional integration have for a long time been top down processes led by the few and imposed on the many The role of citizens especially those active in civil society has been neglected by scholars students and commentators of regionalism In reaction to the prevalence of these top down models a new regionalism approach has proliferated in the past few years This book aims to further develop such a research agenda by providing an up to date overview of the contribution of civil society to world regionalism from Europe to Africa Asia and the Americas This is not only relevant as a research topic it is also of critical importance from a political standpoint As regions across the world experience prolonged governance crises it becomes paramount to understand the extent to which these new regional formations actually reflect the interests and needs of their people While old regionalism was accepted as a de facto elite driven byproduct of both the Cold War and neoliberal globalization the twenty first century regionalism if it is to survive will need to refocus its objectives through new forms of participation and inclusion Regions without citizens are unlikely to stand the test of time especially in times of crises
