## Civil War Nurse:

**The Role of Female Doctors and Nurses in the Civil War** Hallie Murray, 2019-12-15 The Civil War was the bloodiest conflict in American history and although many were uncomfortable with the idea of women interacting with soldiers there simply weren't enough male doctors to meet the needs of the wounded. Women in both the Union and the Confederacy helped fill that need and in the doing so changed the course of American medical history. This book tells the story of many of these brave women including Dorothea Dix an advocate for the mentally ill and the superintendent of army nurses for the Union and Clara Barton a self-taught nurse who founded the Red Cross. *Letters of a Civil War Nurse* Cornelia Hancock, 2022-01-13 She was called The Florence Nightingale of America. From the fighting at Gettysburg to the capture of Richmond this young Quaker nurse worked tirelessly to relieve the suffering of soldiers. She was one of the great heroines of the Union. Cornelia Hancock served in field and evacuating hospitals in a contraband camp and defying authority on the battlefield. Her letters to family members are witty, unsentimental, and full of indignation about the neglect of wounded soldiers and black refugees. Hancock was fiercely devoted to the welfare of the privates who had nothing before them but hard marching, poor fare, and terrible fighting.

**Clara Barton** Charles River Editors, 2020-01-30 Includes pictures. Includes excerpts of Barton's writing. Includes a bibliography for further reading. I may be compelled to face danger but never fear it and while our soldiers can stand and fight I can stand and feed and nurse them. Clara Barton. The Civil War was the deadliest conflict in American history and had the two sides realized it would take 4 years and inflict over a million casualties it might not have been fought. Since it did however Americans have long been fascinated by the Civil War marveling at the size of the battles, the leadership of the generals, and the courage of the soldiers. For over 150 years the war has been subjected to endless debate among civilians, historians, and the generals themselves. The Civil War is often considered one of the first modern wars and while technology affected what happened on the battlefield, technology and new methods also improved the way soldiers were cared for away from the front lines. Civil War medicine is understandably and rightly considered primitive by 21st century standards but the ways in which injured and sick soldiers were removed behind the lines and nursed were considered state of the art in the 1860s and nobody was more responsible for that than Clara Barton, the Florence Nightingale of America. Barton had been an educator and clerk before the Civil War broke out in 1861 but almost immediately she went to work attempting to nurse injured Union soldiers and ensure army hospitals were properly supplied. By 1862 she was shadowing Union armies near Washington to bring supplies, clean field hospitals, and directly nurse wounded soldiers herself. In short order she was recognized as the Angel of the Battlefield. In the wake of the war she gave speeches about her experiences and even went abroad to serve in a similar capacity during the Franco-Prussian War and eventually she brought back the tenets of the International Red Cross to found the American Red Cross. Under her leadership the organization would assist not just during wars but also during natural disasters and other humanitarian crises, roles that
