

A photograph of a military vehicle crossing a temporary bridge over a river. The bridge is constructed from corrugated metal sheets supported by wooden pilings. The vehicle is a dark-colored truck with its headlights on. In the background, a concrete bridge spans the river, and there are some buildings and trees on the far bank. The scene is set in a winter or early spring environment with some snow on the ground.

Civilians And Soldiers Achieving Better Coordination:

Civilians and Soldiers Bruce Pirnie,1998 Since 1989 the United States has embarked on numerous complex contingency operations overseas especially in Somalia Haiti and Bosnia requiring a high degree of coordination between the civilian and military sides of the operations What has the U S government learned and failed to learn from its experience The author examines the erratic performance of the U S in these contingencies and looks at several working models of the interagency process and ways to improve communication between civilian and military communities After analyzing the problems of the past the report offers recommendations to decisionmakers in the Executive Branch to improve chances of success in future complex contingency operations through more coherent U S policy and strategy [Preparing the Army for Stability Operations](#) Thomas S. Szayna,Derek Eaton,Amy Frances Richardson,2007 In 2004 2006 the U S government acted to revise the way that the planning and implementation of Stabilization Security Transition and Reconstruction SSTR operations are conducted The primary emphasis of the changes was on ensuring a common U S strategy rather than a collection of individual departmental and agency efforts and on mobilizing and involving all available U S government assets in the effort The proximate reason for the policy shift stems from the exposing of gaps in the U S ability to administer Afghanistan and Iraq after the U S led ousters of the Taliban and Ba athist regimes But the effort to create U S government capabilities to conduct SSTR operations in a more unified and coherent fashion rests on the deeper conviction that as part of the U S strategy to deal with transnational terrorist groups the United States must have the capabilities to increase the governance capacities of weak states reduce the drivers of and catalysts to conflict and assist in peacebuilding at all stages of pre or post conflict transformation According to the Joint Operating Concept for Military Support to SSTR operations these operations are civilian led and conducted and coordinated with the involvement of all the available resources of the U S government military and civilian nongovernmental organizations NGOs and international partners Although military assets are an essential component of many SSTR operations specific military goals and objectives are only a portion of the larger SSTR operation [Integrating Civilian Agencies in Stability Operations](#) Thomas S. Szayna,Derek Eaton,James E. II Barnett,Brooke Stearns Lawson,Terrence K. Kelly,2009-08-31 How can the Army help make key civilian agencies more capable partners in stability security transition and reconstruction SSTR operations The authors identify the civilian agencies that should be involved in such operations then locate the necessary skill sets They then assess the capacity of the civilian agencies to participate in SSTR operations and analyze the recurring structural problems that have plagued their attempts to do so [Guide to IGOs, NGOs, and the Military in Peace and Relief Operations](#) Pamela R.
