The Black Studies Reader, 2004

The Black Studies Reader Jacqueline Bobo, Cynthia Hudley, Claudine Michel, 2004-05-15 Black studies emerged from the tumultuous social and civil rights movements of the 1960s and empowered African Americans to look at

themselves in new ways and pass on a dignified version of Black history. However, it also enriched traditional disciplines in profound and significant ways. Proponents of Black and ethnic studies confronted the false notion that scholarly investigations were objective and unbiased explorations of the range of human knowledge, history, creativity, artistry, and scientific discovery. As they protested against hegemonic notions like universal psychology and re-evaluated canonical texts in literature, a new model of academic inquiry evolved, one committed to serving a range of populations that critiqued traditional politics, culture, and social affairs and worked with activist energy for the transformation of the existing social order. With an all-star cast of contributors, *The Black Studies Reader* takes on the history and future of this multi-faceted academic field. Topics include Black feminism, cultural politics, Black activism, lesbian and gay issues, African American literature and film, education, and religion. This authoritative collection takes a critical look at the current state of Black studies and speculates on where it may go from here.

Introduction to African American Studies Stephen Balkaran, 2018-12-31. Introduction to African American Studies: A Reader chronicles the experience of African Americans in the United States from their first arrival in 1619 to present day. The reader demonstrates how African Americans and their experiences have shaped America's historical, political, economic, and cultural history, as well as how the Black experience continues to influence American life. In Part I, students read about the continued significance of race in America and receive a primer on African American studies. Part II examines the arrival of Africans to America, the Atlantic Slave Trade, slavery, and states rights in the early republic and the issue of democracy in Jeffersonian America. Part III contains readings about Jim Crow, the roots of Plessy vs. Ferguson, and the Niagara Movement. In Part IV, students learn about the impact of African American artists on literature, arts, and culture from 1927-1940. Part V includes readings on the Civil Rights Movement. The final part speaks to post-racial America in the age of Barack Obama. Gathering thought-provoking and critical literature, *Introduction to African American Studies* is an ideal resource for foundational courses within the discipline. Stephen Balkaran is an instructor of African American studies at Central Connecticut State University, where he initiated, developed, and coordinated a Civil Rights Project in 2006. He previously served as an instructor of political science at Quinnipiac University, the University of Connecticut, TRI-Campus Post University, and Capital Community College. Before launching his academic career, Mr. Balkaran worked for the African National Congress, Nelson Mandela's ruling party in South Africa, in partnership with the University of Connecticut. His educational background spans from the Presentation College in Trinidad to the University of Connecticut and Quinnipiac University School of Law, including a fellowship at Yale University.
