or the body but the entire worldview of the individual It is this aspect of the injury the shattering loss of one's blueprint of the world that is missing from other accounts of trauma Rather than aim to upend previous research in the fields of psychology and neuroscience Merleau Ponty and a Phenomenology of PTSD Hidden Ghosts of Traumatic Memory uses the phenomenological approach to bring them together and expand then It is in this expansion that we are able to consider what we may have previously missed which stands to improve our understanding and treatment of trauma in general
