Bringing Class Back In Contemporary And Historical Perspectives:

Bringing Class Back In Scott G. McNall,2019-03-04 In recent years a flurry of poststructuralist post Marxist and statecentered approaches have emerged in historical and sociological scholarship Far from ignoring these developments the study of class has shaped and been shaped by them As the selections in this volume indicate class analysis changes and develops while sustaining itself as a powerful refined working tool in helping scholars understand the complexities of social and historical processes This volume provides a cross section of the rich body of social theory and empirical research being produced by scholars employing class analysis It demonstrates the variety vibrancy and continuing value of class analysis in historical and sociological scholarship The work of promising young scholars is combined with contributions from well established figures to produce a volume that addresses continuing debates over the relationship between structure and agency the centrality of class relations and the dynamics of class formation class culture and class consciousness

Class and Conflict in the Fishers' Community in Indonesia Rilus A. Kinseng,2020-01-14 This book analyses social conflict among fishers in Indonesia by implementing class theory thus adopting a new approach to analysing fishers conflicts in Indonesia In using this approach the book enables a comprehensive understanding of the nature of fishers social conflicts It demonstrates that the primary cause triggering conflict among fishers in Indonesia is not exploitation but domination This domination causes injustice in terms of access among fishers which in turn threatens their livelihood The author unpacks the influence of political parties and how macro economic conditions and public policy have become contextual variables of these class conflicts in the fisheries community The book presents the unique characteristics of class conflicts among fishers compared to class conflicts in industrial sectors underpinned by Marxist theory This book will be relevant to fisheries policy makers in Indonesia and abroad researchers and students in anthropology sociology and development economics as well as community and rural development specialists and conservationists

Social Class in Contemporary Japan Hiroshi Ishida,David H. Slater,2009-10-16 Through examination of contemporary Japanese society this book demonstrates that the analysis of class formation is fundamental for a clear understanding of institutions and collective identity such as family school work gender and ethnicity

Working Knowledge Catherine L. Fisk,2009-11-01 Skilled workers of the early nineteenth century enjoyed a degree of professional independence because workplace knowledge and technical skill were their property or at least their attribute In most sectors of today s economy however it is a foundational and widely accepted truth that businesses retain legal ownership of employee generated intellectual property In Working Knowledge Catherine Fisk chronicles the legal and social transformations that led to the transfer of ownership of employee innovation from labor to management This deeply contested development was won at the expense of workers entrepreneurial independence and ultimately Fisk argues economic democracy By reviewing judicial decisions and legal scholarship on all aspects of employee generated intellectual property and combing the archives of major nineteenth century intellectual property producing

companies including DuPont, Rand McNally and the American Tobacco Company. Fisk makes a highly technical area of law accessible to general readers while also addressing scholarly deficiencies in the histories of labor, intellectual property and the business of technology. **Ukrainian Intelligentsia in Post-Soviet Lviv** Eleonora Narvselius, 2012-04-05

Intelligentsia assumes the right to speak in the name of the entire nation and to extrapolate its own tastes, values and choices to it. Therefore intelligentsia's voices have been in many ways decisive in the discussions about Ukrainian national identity which gained momentum in the post-Soviet Ukrainian society. The historical and cultural cityscape of Lviv is an especially apt site for investigation of the nexus intelligentsia-nation not only in the Ukrainian but in the East-Central European context. This borderline city while not being a remarkable industrial, administrative or political centre has acquired the reputation of a site of unique cultural production and a principal center of the Ukrainian nationalist movement throughout the twentieth century. Here the popular conceptions of intelligentsia have been elaborated at the intersection of various cultural, historical and political traditions. This study addresses Ukrainian-speaking intelligentsia and intellectuals in Lviv both as a discursive phenomenon and as the social category of cultural producers who in the new circumstances both articulate the nation and are articulated by it. *Mzala Nxumalo, Leftist Thought and Contemporary South Africa* Robert J. Balfour, 2024-10-04

Written as a tribute to the revolutionary intellectual and leader Mzala Nxumalo, this book discusses the significance of his work in the context of contemporary South African left politics. It explores the history and struggle of the apartheid era that preceded the advent of democracy to analyze a crucial aspect of the national question that is the quest for the establishment of a united South Africa to overcome racist and sexist policies that create and nurture divisions among black people. The subjects in this book deal with a wide range of topics including the new social, economic and political challenges facing democratic South Africa, the need to reexamine the critique of capitalism in the 21st century, the relationship between race, class and community struggles and the ecological challenges under capitalism. Print edition not for sale in Sub-Saharan Africa.

Cultural Hegemony in the United States Lee Artz, Bren Ortega, Murphy, 2000-06-23. Popular usage equates hegemony with dominance, a meaning far from Antonio Gramsci's original concept where hegemony appears as a contested culture that meets the minimum needs of the majority while serving the interests of the dominant class. This text is the first to present cultural hegemony in its original form as a process of consent, resistance and coercion. Hegemony is illustrated with examples from American history and contemporary culture including practices that represent race, gender and class in everyday life. U.S. cultural hegemony depends in part on how well media, government and other dominant institutions popularize beliefs and organize practices that promote individualism and consumerism. Corporate dominance and market values reign only through the consent of the majority which for the time being finds material, political and cultural benefit from existing social relations. As deep social contradictions undermine brittle hegemonic relations, the subordinate majority including blacks, women and workers will seek a new cultural hegemony that overcomes race, gender and class inequality. *A Theory of Global*

Capitalism William I. Robinson, 2004-03-12 In this book sociologist William Robinson offers a theory of globalization that follows the rise of a new capitalist class and a new type of state formation He explains how global capital mobility has allowed capital to reorganize production worldwide in accordance with a whole range of considerations that allow for maximizing profit making opportunities This worldwide decentralization and fragmentation of the production process has taken place alongside the centralization of command and control of the global economy in transnational capital In turn this economic reorganization finds a political counterpart in the rise of the transnational state In the future Robinson argues hegemony will be exercised not by a particular nation state but by the new global ruling class who regardless of their nationality tend to share similar lifestyles and interact through expanding networks of this transnational state In this way the process of globalization is unifying the world into a single mode of production that is increasingly integrating different countries and regions into a new global economy and society Robinson concludes that because the new global capitalism is rife with

Social Welfare Policy in South Korea Myungsook Woo, 2003 *Labour History*, 2002 [A New Politics](#) Sara Abraham, 1999 **Paperbound Books in Print**, 1992 [Discipline and Development](#) Diane E. Davis, 2004-03-22 Perhaps the most commonly held assumption in the field of development is that middle classes are the bounty of economic modernization and growth As countries gradually transcend their agrarian past and become urbanized and industrialized so the logic goes middle classes emerge and gain in number complexity cultural influence social prominence and political authority Yet this is only half the story Middle classes shape industrial and economic development they are not merely its product the particular ways in which middle classes shape themselves and the ways historical conditions shape them influence development trajectories in multiple ways This is the story of South Korea's and Taiwan's economic successes and Argentina's and Mexico's relative failures through an examination of their rural middle classes and disciplinary capacities Can disciplining continue in a context where globalization squeezes middle classes and frees capitalists from the state and social contracts in which they have been embedded

Materializing Nation and Gender Hyun Ok Park, 1994 **Clerical Workers and Secretaries** Cathleen Lynn Armstead, 1994 **International Journal on World Peace**, 1992 "We are All Leaders" Staughton Lynd, 1996 We Are All Leaders describes a kind of union qualitatively different from the bureaucratic business unions that make up the AFL CIO today From African American nutpickers in St Louis chemical and rubber workers in Akron textile workers in the South and bootleg miners in Pennsylvania to tenant farmers in the Mississippi Delta packinghouse and garment workers in Minnesota seamen in San Francisco and labor party campaigns throughout the country workers in the 1930s were experimenting with community based unionism [Journal of Sociology and Social Welfare](#), 1997 Includes unpublished papers presented at the Division's meetings **Social Relations in a Railroad Town** Marla Jon Hughes, 1996 *Plastic Sandals, Tea and Time* Samer Said Shehata, 2000
