to the oceanography and resources of the region It is unique in providing a detailed review of the resources of the north west
European continental shelf together with a comprehensive description of the environment Introducing the shelf region as if it
were a new country Jack Hardisty explores first its physical environment and then summarizes the distribution and
exploitation of resources from the environment Part 1 on the oceanography covers the shape of the shelf its geological
history and its wave and tidal regimes Part 2 on the resources looks at trade and shipping and the hydrocarbon fishing and
seabed mining industries It goes on to discuss wave and tidal power and to consider the problem of pollution in terms of
resource utilization The industrial technology and the environmental potential of each resource are examined and the
economic and legislative restrictions are analysed **The British seas, by W.C. Russell and other writers** William Clark
