British Industrial Decline:

The British Industrial Decline Michael Dintenfass, Jean-Pierre Dormois, 2002-11-01 The decline of British Industry in the late Victorian and early Edwardian period is the subject of major concern to economic and modern British historians This book sets out the present state of the discussion and introduces new directions in which the debate about the British decline is now proceeding Among other themes the book examines the role of the service sector alongside manufacturing the distinctiveness of the British regions the state's role in the British decline including an analysis of its responsibility for the maintenance and modernization of infrastructure the association of aristocratic values with entrepreneurial vitality how British historians have discussed success and failure with a critique of the literature of decline

The Decline of Industrial Britain Michael Dintenfass, 2006-02 The first synthesis of Britain's long term economic performance in more than a decade this book examines why British economic growth has failed to keep pace with the performance of the other advanced industrial economies since 1870

The British Industrial Decline Michael Dintenfass, Jean-Pierre Dormois, 2002-11 This book sets out the present state of the discussion of the decline in British industry and introduces new directions in which the debate is now proceeding

Reversing Industrial Decline Paul Q. Hirst, 1989 This book offers new and radical views on British industrial decline and policies to remedy it

The Decline of British Industry: Its Cause and Remedy Fedor Aronovich Rotshtein, 1903

British Industrial Capitalism Since The Industrial Revolution Roger Lloyd-Jones, Merv Lewis, 2014-05-22 The authors use a long wave framework to examine the historical evolution of British industrial capitalism since the late 18th century and present a challenging and distinctive economic history of modern and contemporary Britain The book is intended for undergraduate courses on the economic history of modern Britain within history economic and social history economic history and economic degree schemes and economic theory courses

Science, Technology and the British Industrial 'Decline', 1870-1970 David Edgerton, 1996-06-28 The place of science and technology in the British economy and society is widely seen as critical to our understanding of the British decline There is a long tradition of characterising post 1870 Britain by its lack of enthusiasm for science and by the low social status of the practitioners of technology David Edgerton examines these assumptions analysing the arguments for them and pointing out the different intellectual traditions from which they arise Drawing on a wealth of statistical data he argues that British innovation and technical training were much stronger than is generally believed and that from 1870 to 1970 Britain's innovative record was comparable to that of Germany This book is a comprehensive study of the history of British science and technology in relation to economic performance It will be of interest to scientists and engineers as well as economic historians and will be invaluable to students approaching the subject for the first time

Modernization Frustrated Scott Newton, Dilwyn Porter, 2026-01-30 First published in 1988 Modernization Frustrated now with a new preface by the authors is a provocative analysis of modern British economic and political history It takes as its central theme the ascendancy of the

core financial institutions the City the Bank of England and the Treasury and argues that in the legitimate pursuit of their own interests the financiers have committed the British state to a liberal economic orthodoxy which is very often at conflict with the best interests of British producers Tracing the roots of this financial ascendancy back to the 18th and 19th centuries the authors highlight how early industrialists were excluded from circles of wealth and power due to class prejudice a legacy that persisted well into the 20th century This enduring bias has allowed the free movement of capital to take precedence over the funding and restructuring needs of industry contributing to Britain's decline as a manufacturing economy compared to other developed capitalist nations Continuous modernization is a pre requisite for the survival and development of an industrial economy and the authors describe in detail the many initiatives and movements throughout the 20th century which were rendered ineffective because the proponents were unable to secure the support of government and financial institutions

Alfred Herbert Ltd and the British Machine Tool Industry, 1887-1983 Roger Lloyd-Jones, M.J. Lewis, 2017-09-29 At the beginning of the twentieth century Britain was amongst the world leaders in the production of machine tools yet by the 1980s the industry was in terminal decline Focusing on the example of Britain's largest machine tool maker Alfred Herbert Ltd of Coventry this study charts the wider fortunes of this vital part of the manufacturing sector Taking a chronological approach the book explores how during the late nineteenth century the industry developed a reputation for excellence throughout the world before the challenges of two world wars necessitated drastic changes and reorganisations Despite meeting these challenges and emerging with confidence into the post war market place the British machine tool industry never regained its pre eminent position and increasingly lost ground to foreign competition By using the example of Alfred Herbert Ltd to illuminate the broader economic and business history of the British machine tool industry this study not only provides a valuable insight into British manufacturing but also contributes to the ongoing debates surrounding Britain's alleged decline as a manufacturing nation

British Imperialism P.J. Cain, A. G. Hopkins, 2014-01-14 A milestone in the understanding of British history and imperialism and truly global in its reach this magisterial account received numerous accolades from reviewers in its first edition The first to coin the phrase gentlemanly capitalism Cain and Hopkins make the strong and provocative argument that it is impossible to understand the nature and evolution of British imperialism without taking account of the peculiarities of her economic development In particular the growth of the financial sector and above all the City of London played a crucial role in shaping the course of British history and Britain's relations overseas Now with a substantive new introduction and a conclusion the scope of the original account has been widened to include an innovative discussion of globalization

The British Industrial Decline Reconsidered Jean-Pierre Dormois, Michael Dintenfass, 1998

The Causes of Decay in a British Industry "Artifex," pseud., 1907 *Understanding Decline* P. F. Clarke, Clive Trebilcock, 1997-12-11 The theme of British economic decline is inescapable in contemporary debates about Britain's economic performance and sense of national identity *Understanding Decline* is a serious contribution to an important

argument approached in a way that is accessible not only to the specialist academic market but to students of economics history and politics Barry Supple to whom the volume is dedicated when Professor of Economic History at Cambridge was concerned with various aspects of this historical problem Indeed his 1993 Presidential Address to the Economic History Society Fear of failing already a classic is reprinted here as a highly effective keynote essay Other essays pick up this theme in diverse but essentially unified ways seeking to assess British economic performance in different ways over the past two centuries They include case studies through which the reality of decline can be explored while differing perceptions of decline are examined in a number of essays dealing with ideas and policy issues

Whatever Happened to Britain? John Eatwell, 1982 Monograph on declining industrial production and economic growth trends and causes in the UK comprising economic policy suggestions for economic recovery discusses the historical background lessons from other developed countries and the impact of policies based on free trade market economy and Keynesian economic theories and advocates long term economic planning higher public expenditure lower taxation industrial policy linkage with trade policies protectionism etc Graphs references and statistical tables

Was Britain's relative economic decline before 1914 an inevitable consequence of foreign industrialisation or a manifestation of serious failings within the domestic economy? Nadine Röpke, 2006-07-10 Essay from the year 2004 in the subject English Language and Literature Studies Culture and Applied Geography grade 2 0 University of Birmingham Department of History course The History of Modern Britain language English abstract At the end of the 19th century Great Britain experienced an economic decline the reasons for which are still controversially discussed among historians While some stress the changes in the world economy due to the spread of industrialization in the 19th century others hold the view that serious failings within the domestic economy are the major causes for Britain's downfall After a short description of the degree of Britain's decline before 1914 some of the major reasons for Britain's relative economic decline will be analyzed and compared The aim of this paper will be to evaluate the severity of external changes that the British had no control of as well as internal failings within the British economy that contributed to Britain's relative economic decline Writing about Britain's economic decline at the end of the 19th Century it is first of all necessary to define in how far one can speak of a decline Most historians point out that Britain's economic decline is only a relative one They argue that in comparison to Britain's earlier growth or in relation to the growth of other advanced countries like e.g. the USA or Germany one can realize a decline in the economic performance of Great Britain but that in general there was no decline in the last third of the 19th century Alford renders it more precisely by saying that British enterprise it will be argued did not decline during this period it remained remarkably constant and inflexible In fact Britain's GDP was still rising between 1870 and 1890 but like mentioned before the annual rate of growth was much slower According to Crouzet Britain achieved a growth rate of 3.1 per cent from 1811 to 1877 while it fell to only 1.6 per cent between 1877 and 1913 That causes historians to differ in terms of the beginning of the decline Most historians refer to the year 1873 when

they talk about the beginning of Britain's decline while others argue that Britain achieved its most rapid growth in industrial production in the 1820s and 1830s and that the time of Victoria's accession could therefore be regarded as the true beginning of the relative economic decline. Nevertheless in this paper the time around 1870 will be regarded as the beginning of Britain's economic decline since it was between 1870 and 1913 that Britain's share of the total world industrial production fell from 31.8 per cent to 14 per cent.
