British Marxist Historians An Introductory Analysis:

The British Marxist Historians Harvey J. Kaye, 2022-09-30 The British Marxist Historians remains the first and most complete study of the founders of one of the most influential contemporary academic traditions in history and social theory In this classic text Kaye looks at Maurice Dobb and the debate on the transition to capitalism Rodney Hilton on feudalism and the English peasantry Christopher Hill on the English Revolution Eric Hobsbawm on workers peasants and world history and E P Thompson on the making of the English working class Kaye compares their perspective on history with other approaches such as that of the French Annales school and concludes with a discussion of the British Marxist historians contribution to the formation of a democratic historical consciousness The British Marxist Historians is an indispensable book for anyone interested in the intellectual history of the late twentieth century

The British Marxist Historians Harvey J. Kaye, 1986

Hobsbawm Gregory Elliott, 2010-10-05 From the early rumblings of the French revolution at the start of the long nineteenth century to the fall of the Soviet bloc at the close of the short twentieth century historian Eric Hobsbawm is possibly the foremost chronicler of the modern age Hobsbawm was a chronicler of revolutions labour history Empire and conflicts whose writings have informed the historical consciousness of scholars and general readers alike From colonialism to capitalism his trilogy of histories The Age of Revolution The Age of Capital and The Age of Empire evidence his skill for identifying the plurality of forces at play in major historical events Tracing his intellectual and political journey and encompassing the extraordinary historical events that marked his life Gregory Elliot fills an analytical gap on Hobsbawm s scholarship and Marxist historiography

Professional Historians in Public Berber Bevernage, Lutz Raphael, 2023-07-24 The past decades public interest in history is booming This creates new opportunities but also challenges for professional historians This book asks how historians deal with changing public demands for history and how these affect their professional practices values and identities The volume offers a great variety of detailed studies of cases where historians have applied their expertise outside the academic sphere With contributions focusing on Latin America Africa Asia the Pacific and Europe the book has a broad geographical scope Subdivided in five sections the book starts with a critical look back on some historians who broke with mainstream academic positions by combining their professional activities with an explicit political partisanship or social engagement The second section focusses on the challenges historians are confronted with when entering the court room or more generally exposing their expertise to legal frameworks The third section focuses on the effects of policy driven demands as well as direct political interventions and regulations on the historical profession A fourth section looks at the challenges and opportunities related to the rise of new digital media Finally several authors offer their view on normative standards that may help to better respond to new demands and to define role models for publicly engaged historians This book aims at historians and other academics interested in public uses of history

Encyclopedia of Historians and Historical Writing Kelly Boyd, 1999 Contains over 800 entries ranging from Lord Acton and Anna

Comnena to Howard Zinn and Herodotus to Simon Schama Over 300 contributors have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from *Maurice Dobb* T. Shenk,2013-12-17 This book explores the life of the man whom even his critics acknowledged was one of the world s most significant Communist economists From his outpost at the University of Cambridge where he was a prot g of John Maynard Keynes and mentor to students Dobb made himself into one of British communism s premier intellectuals **Speaking for the People** Jon Lawrence,2002-05-09 *Speaking for the People* first published in 1998 draws our attention to the problematic nature of politicians claims to represent others and in doing so it challenges conventional ideas about both the rise of class politics and the triumph of party between 1867 and 1914 The book emphasises the strongly gendered nature of party politics before the First World War and suggests that historians have greatly underestimated the continuing importance of the politics of place Most importantly however *Speaking for the People* argues that we must break away from teleological notions such as the modernisation of politics the taming of the popular or the rise of class Only then will we understand the shifting currents of popular politics *Speaking for the People* represents a major challenge to the ways in which historians and political scientists have studied the interaction between party politics and popular political cultures **Bond Men Made Free** Rodney Hilton,2024-05-01 The Peasants Revolt of 1381 led by Wat Tyler was the first popular uprising in British history Centred around the counties of South East England and rebelling against legislation to fix minimum wages it was driven by agricultural labourers and the urban working classes but quickly gathered momentum to encompass artisans villeins and the destitute Although it lasted only a month before defeat it was a major turning point in early British history and was heralded by many historians as the emergence of British working class consciousness and political activism Rodney Hilton s superb account of these events remains a classic widely read and admired since its first publication Locating the revolt in the context of European class conflict he argues that the peasant movements that disturbed the Middle Ages were not mere unrelated outbreaks of violence but had their roots in common economic and political conditions and in a recurring conflict of interest between peasants and landowners one that has endured through the ages This Routledge Classics edition includes a new Foreword by Phillipp R Schofield **Making History** Peter Lambert,Phillipp Schofield,2004-08-02 *Making History* offers a fresh perspective on the study of the past It is an exhaustive exploration of the practice of history historical traditions and the theories that surround them Discussing the development and growth of history as a discipline and of the profession of the historian the book encompasses a huge diversity of influences organized around the following themes the professionalization of the discipline the most significant movements in historical scholarship in the last century including the Annales School the increasing interdisciplinary trends in scholarship theory in historical practice including Marxism post modernism and gender history historical practice outside the academy The volume offers a coherent set of chapters to support undergraduates postgraduates and others interested in the historical processes that have shaped the discipline of

Frazer,Andrew Tyrell,2001-01-01 Social identity is a concept of increasing importance in the social sciences Here the concept is applied to the often atheoretical realm of medieval studies Each contributor focuses on a particular topic of early medieval identity ethnicity national identity social location subjectivity personhood political organization kinship the body gender age proximity regionality memory and ideological systems The result is a pioneering vision of medieval social identity and a challenge to some of the received general wisdoms about this period *Recent Historians of Great Britain* Walter L. Arnstein,1990 *History, Historians, and the Dynamics of Change* William A. Green,1993-02-22 Green offers a remarkably lucid erudite and insightful description and analysis of the theoretical foundations of modern historical writing He is the first to provide an orderly introduction to the several systematic models by which leading modern historians have attempted to explain continuity and change This cogent survey is essential to an understanding of modern Western historiography The book introduces history as a theoretical discipline Green examines the many pitfalls of historical writing and demonstrates that historical truth is a most elusive quarry He addresses periodization the manner in which past time is divided showing how prevailing modes of periodization have evolved in the West Part two of the book is concerned with the dynamics of change in European history Each chapter considers a specific theoretical orientation including the commercial model initiated by Adam Smith and pursued by Henri Pirenne and others the demographic model first formulated by Malthus the Marxian model or models and the approaches of Weber and Sombart who identified religious forces as the chief engines of historical change Part three addresses models of change being employed in world history particularly the world system approach of Frank and Wallerstein and the creative orientations of environmental historians In his conclusion Green returns to the question of whether the theoretical models of change currently in use among historians are consistent with contemporary modes of periodization The bibliography is extensive **British Books in Print** ,1985 *Connections* ,1987
