From Idiocy to Mental Deficiency Anne Digby, David Wright, 2002-09-09 From Idiocy to Mental Deficiency is the first book devoted to the social history of people with learning disabilities in Britain Approaches to learning disabilities have changed dramatically in recent years The implementation of Care in the Community the campaign for disabled rights and the debate over the education of children with special needs have combined to make this one of the most controversial areas in social policy today The nine original research essays collected here cover the social history of learning disability from the Middle Ages through the establishment of the National Health Service They will not only contribute to a neglected field of social and medical history but also illuminate and inform current debates The information presented here will have a profound impact on how professionals in mental health psychiatric nursing social work and disabled rights understand learning disability and society s responses to it over the course of history

Waterloo Sunrise John Davis, 2024-03-26 This is an urban history of London during the pivotal years of the 1960s and 1970s when the metropolis was transformed from an industrial city that the Victorians might have recognised to an embryonic modern world city Previous work on London in these years has tended to focus upon the 1960s in particular the Swinging London phenomenon Mary Quant Carnaby Street and the King s Road Chelsea all appear in these pages but it is argued that the swinging moment of the mid sixties was a passing symptom of a much broader transformation from an industrial to a service based city and it is that transformation which this book examines London is too complex and diverse a city to be comprehended in a simple linear narrative this book adopts instead an innovative approach to urban history by which London life and London s transformation are examined through a number of case studies looking at specific themes and areas of the city Consumerism and the experience economy home ownership and gentrification deindustrialisation and deprivation racial tension and unemployment the attrition of public services and the steady loss of confidence in public agencies national and local emerge as overarching themes from the individual case studies in this book Their combined effect it is argued was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 without Thatcher herself having anything to do it

Publics and their health Alex Mold, Peder Clark, Hannah J. Elizabeth, 2023-03-07 The COVID 19 pandemic has resulted in a renewed interest in the relationship between public health authorities and the public Particular attention has been paid to problem publics who do not follow health advice This is not a new issue As the chapters in this collection demonstrate the designation of certain groups or populations as problem publics has long been a part of health policy and practice By exploring the

creation and management of these problem publics in a range of time periods and geographical locations the collection sheds light on what is both specific and particular For health authorities publics themselves were often thought to pose problems because of their behaviour identity or location But publics could and did resist this framing There were and continue to be many problems with seeing publics as problems
