Citizen In Space:

Citizen in Space Robert Sheckley,1969 **Citizen in Space** Robert Sheckley,1955 **Designing & Building Space Colonies** Martin K. Ettington,2022-07-22 Designing Building Space Colonies A Blueprint for the Future One of the greatest adventures in the future of humanity will be to construct work and live in space based structures In this book we look at the history of ideas for living in space proposed space colony designs and technology The details of current life support technology on the International Space Station is reviewed and what technologies will be required for development of large scale space colonies What other things in terms of financing and materials availability will be needed also Finally we conclude with some recommendations to get us ready to build these colonies *Citizens as Partners Information, Consultation and Public Participation in Policy-Making* OECD,2001-10-11 This book examines a wide range of country experiences offers examples of good practice highlights innovative approaches and identifies promising tools including new information technologies for engaging citizens in policy making It proposes a set of ten guiding principles **Research Tracks in Urbanism: Dynamics, Planning and Design in Contemporary Urban Territories** Alessia Allegri,Angélica Benatti Alvim,Eunice Helena Abascal,Joaquin Sabaté,João Pedro Costa,Maria Cristina Schicchi,2021-09-12 Maybe the Global Village metaphor has never been more accurate than it is today where societies join forces in the fight against the COVID 19 pandemic in a global coordinated effort possibly never tested before in the known history of Humankind Although we are sure that in the past some other shared demands have united the different peoples of the world this has never been so strongly necessary mainly in what the global scientific community is concerned This is a fight for the survival of a society However we should not lose sight of what we are fighting for We fight together for people Not just for the abstract value of Human life but for life in society as a whole including its moral and ethical aspects The topics of this book are based on this claim on what makes it possible We do not build our lives in a vacuum or in distant Invisible Cities but through a higher value which represents physical life in society the City built by the discipline of Urbanism This book is a spin off of the International Research Seminar on Urbanism_SIIU2020 Inspired by the contents of twelve research seminars a group of researchers from the universities of Barcelona Lisbon and S o Paulo discuss the contemporary agenda of research in Urbanism Following the conference a selection of 35 original double blind peer reviewed research papers were brought together with different perspectives about such an agenda **Engaging Citizens in Policy Making** Randma-Liiv, Tiina,Lember, Veiko,2022-02-15 This is an open access title available under the terms of a CC BY NC ND 4 0 License It is free to read download and share on Elgaronline com Exploring academic and policy thinking on e participation this book opens up the organizational and institutional black box and provides new insights into how public administrations in 15 European states have facilitated its implementation *Ubiquitous Computing, Complexity and Culture* Ulrik Ekman,Jay David Bolter,Lily Diaz,Morten Sondergaard,Maria Engberg,2015-12-22 The ubiquitous nature of mobile and pervasive computing has begun to reshape and

complicate our notions of space time and identity In this collection over thirty internationally recognized contributors reflect on ubiquitous computing s implications for the ways in which we interact with our environments experience time and develop identities individually and socially Interviews with working media artists lend further perspectives on these cultural transformations Drawing on cultural theory new media art studies human computer interaction theory and software studies this cutting edge book critically unpacks the complex ubiquity effects confronting us every day The companion website can be found here <http://ubiquity.dk>

Performing Citizenship Paula Hildebrandt, Kerstin Evert, Sibylle Peters, Mirjam Schaub, Kathrin Wildner, Gesa Ziemer, 2019-02-05 This open access book discusses how citizenship is performed today mostly through the optic of the arts in particular the performing arts but also from the perspective of a wide range of academic disciplines such as urbanism and media studies cultural education and postcolonial theory It is a compendium that includes insights from artistic and activist experimentation Each chapter investigates a different aspect of citizenship such as identity and belonging rights and responsibilities bodies and materials agencies and spaces and limitations and interventions It rewrites and rethinks the many layered concept of citizenship by emphasising the performative tensions produced by various uses occupations interpretations and framings

Traces of a Mobile Field James R Faulconbridge, Allison Hui, 2017-10-02 This agenda setting collection critically reflects upon a decade of contributions to the social scientific mobilities turn in order to propose new trajectories for the future of this interdisciplinary research field The chapters are all exemplars of how the past decade of research has opened up new insights into the place of mobilities in societies They also highlight how attempts to look forward towards new conversations understandings and interventions in a mobile world will emerge from the transformations invoked by this field of research Authors foreground issues of power interdisciplinarity transformative technologies fragmented discourses and changing social processes whilst addressing automobility aeromobility tourism communications technologies urban infrastructures migration and emergencies As a whole the collection raises important questions about not only how understandings of mobilities are changing but also how the field of mobilities research is itself on the move The evocative empirical cases and provocative arguments in this book thus highlight the necessity of new concepts conversations methods empirical studies and interventions to address transformations in both the complex mobilities of social worlds and what is examined or taken for granted in mobilities research itself This book was originally published as a special issue of *Mobilities*

Space Tourism Erik Cohen, Sam Spector, 2019-09-06 This is the first comprehensive multi disciplinary work on the emergent phenomenon of space tourism It is written by leading specialists and covers a wide spectrum of topics including space history and technology the environmental social and legal aspects of the development of a future space tourism industry and space tourism marketing
