Citizenship Education in China Kerry J. Kennedy, Gregory Fairbrother, Zhenzhou

Zhao,2013-10-15 There is a flourishing literature on citizenship education in China that is mostly unknown in the West Liberal political theorists often assume that only in democracy should citizens be prepared for their future responsibilities yet citizenship education in China has undergone a number of transformations as the political system has sought to cope with market reforms globalization and pressures both externally and within the country for broader political reforms Over the past decade Chinese scholars have been struggling for official recognition of citizenship education as a key component of the school curriculum in these changing contexts This book analyzes the citizenship education issues under discussion within China and aims to provide a voice for its scholars at a time when China s international role is becoming increasingly important

Citizens of the World ,2011-01-01 Taken as a whole this book argues that the very idea of what it means to be a citizen in our global cosmopolitan world is no longer as clear as it may have been for an Athenian democrat of the fifth century BC a Roman Republican of the first century BC a British coloniser of the eighteenth century or an American patriot of the nineteenth century Given the now undeniable fact of pluralism highlighted by globalisation and the massive movement of peoples across borders alongside the legal expansion of rights to minority groups in Western democracies throughout the twentieth century the idea of citizenship now immediately implicates the problem of inclusion Pluralism and migration also make identity an increasingly fragile and important concept that is only loosely tethered to the meaning of citizenship This book shows that the very idea of what it means to be a citizen of a state was complex and uncertain And that the concept of citizenship was being actively rethought from the different disciplines represented at the conference sociology anthropology literary studies communication studies and political science to name a few Unity ,1922 **Global Citizen Formation** Amy Shumin Chen,2021-07-17 This book explains the rationale of the changes and challenges of Taiwanese citizenship which emphasizes the various identities in the global and multicultural era It explores the evolving relationship between the social movements citizenship the education of citizens and the young peoples viewpoints asking how citizenship has been conceptualised in a dramatic transformation age How has the curriculum and pedagogy designed to fit the global changes for cultivating young generations with rights and responsibilities to interpret in and adapt for the competence of citizenship And what outcomes and attainments had the Taiwan's undergraduates knowledge attitudes and practices of competency on citizenship **Global Citizens Protect the World Community** Elliot Paderewski,2016-07-15 This non fiction title supports and explains a child's world reinforcing positive social messages around being a contributing family member a good student and a good citizen When paired with its fiction title counterpart it allows emerging readers to engage with both fiction and informational texts on the same subject matter thus gaining different perspectives new vocabulary and new approaches to the same content **Theodore Roosevelt** Frederick E. Drinker,Jay Henry Mowbray,1919 He would not have liked it perhaps that one call him a pedagogue and yet in the passing of the great man Theodore Roosevelt on January 6 1919 America lost one of her foremost teachers Sturdy Americanism was his major subject and he taught it with a vigor and enthusiasm which left its mark upon the nation No brick walls limited the sphere of his influence The breadth of the land was his classroom and his students were of the millions everywhere who found their lessons in his daily life For perhaps more than any other public man of his day Theodore Roosevelt with the courage of his convictions practiced what he preached Introduction **The Dimensions of Global Citizenship** Darren J. O'Byrne,2004-11-23 The Dimensions of Global

Citizenship takes issue with the assumption that ideas about global citizenship are merely Utopian ideals. The author argues that far from being a modern phenomenon, world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system. Only in the post-war era has this ideal become politically meaningful. This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens.

Postcolonial Perspectives on Global Citizenship Education Vanessa de Oliveira Andreotti, Lynn Mario T. M. de Souza, 2012-02-06. This volume bridges the gap between contemporary theoretical debates and educational policies and practices. It applies postcolonial theory as a framework of analysis that attempts to engage with and go beyond essentialism, ethno and euro centrisms through a critical examination of contemporary case studies and conceptual issues. From a transdisciplinary and post-colonial perspective, this book offers critiques of notions of development, progress, humanism, culture, representation, identity, and education. It also examines the implications of these critiques in terms of pedagogical approaches, social relations, and possible future interventions.
