Roberts, 2015-01-28 Citizen involvement is considered the cornerstone of democratic theory and practice Citizens today have the knowledge and ability to participate more fully in the political technical and administrative decisions that affect them On the other hand direct citizen participation is often viewed with skepticism even wariness Many argue that citizens do not have the time preparation or interest to be directly involved in public affairs and suggest instead that representative democracy or indirect citizen participation is the most effective form of government Some of the very best writings on this key topic which is at the root of the entire reinventing government movement can be found in the journals that ASPA publishes or sponsors In this collection Nancy Roberts has brought together the emerging classics on the ongoing debate over citizen involvement Her detailed introductory essay and section openers frame the key issues provide historical context and fill in any gaps not directly covered by the articles More than just an anthology *The Age of Direct Citizen Participation* provides a unique and useful framework for understanding this important subject It is an ideal resource for any Public Administration course involving citizen engagement and performance management Citizen-Centered Public Policy Making in Turkey Volkan Göçoğlu, Naci Karkin, 2023-08-29 This edited volume discusses direct citizen participation and public policymaking in Turkey Written by a diverse group of scholars and practitioners this book advances the field of public policy by critically examining whether and how direct citizen participation may add value to government business Structurally the book focuses on the core topics of public administration the generation of public services the design and implementation of public policies citizens and networks new business models and local perspectives Using Turkey as a case study this volume fills a gap in the literature and will appeal to researchers interested in public policy in the MENA context Public Participation in Environmental

Assessment and Decision Making National Research Council, Division of Behavioral and Social Sciences and Education, Committee on the Human Dimensions of Global Change, Panel on Public Participation in Environmental Assessment and Decision Making, 2008-12-07 Federal agencies have taken steps to include the public in a wide range of environmental decisions. Although some form of public participation is often required by law, agencies usually have broad discretion about the extent of that involvement. Approaches vary widely from holding public information gathering meetings to forming advisory groups to actively including citizens in making and implementing decisions. Proponents of public participation argue that those who must live with the outcome of an environmental decision should have some influence on it. Critics maintain that public participation slows decision making and can lower its quality by including people unfamiliar with the science involved. This book concludes that when done correctly, public participation improves the quality of federal agencies' decisions about the environment. Well-managed public involvement also increases the legitimacy of decisions in the eyes of those affected by them, which makes it more likely that the decisions will be implemented effectively. This book recommends that agencies recognize public participation as valuable to their objectives, not just as a formality required by the law. It details principles and approaches agencies can use to successfully involve the public.

The Role of Public Participation in Energy Transitions Ortwin Renn, Frank Ulmer, Anna Deckert, 2020-03-21 The Role of Public Participation in Energy Transitions provides a conceptual and empirical approach to stakeholder and citizen involvement in the ongoing energy transition conversation, focusing on projects surrounding energy conversion and efficiency, reducing energy demand, and using new forms of renewable energy sources. Sections review and contrast different approaches to citizen involvement, discuss the challenges of inclusive participation in complex energy policymaking, and provide conceptual foundations for the empirical case studies that constitute the second part of the book. The book is a valuable resource for academics in the field of energy planning and policymaking, as well as practitioners in energy governance, energy and urban planners, and participation specialists.
