**Citizenship Beyond the State** John Hoffman, 2004-03-16 Is citizenship still a useful concept Can citizens and democracy exist independently of the state This text provides an accessible guide to the theories and debates that surround the key political concepts of state citizenship and democracy today John Hoffman reviews the modern development of these concepts from the classic texts of Marx and Weber to the post war critiques of the feminist multicultural and critical theorists and considers the on going barriers to a full realisation of a democratic citizenship By carefully considering what the state is and what it does Hoffman shows that it is possible to respond to these critiques and challenges and reclaim citizenship and democracy as inclusive and emancipatory rather than divisive and controlling In advancing this alternative view of a stateless citizenship Hoffman opens up new possibilities for conceiving power and society in contemporary politics today It will be essential reading for all students of politics and sociology for whom the questions of state nationality power and identity remain of central importance

**Citizenship Beyond the State** John Hoffman, 2004-05-25 Guide to the theories and debates that surround the key political concepts of state citizenship and democracy today *Citizenship Agendas in and beyond the Nation-State* Martijn Koster, Rivke Jaffe, Anouk de Koning, 2018-04-19 In today's world citizenship is increasingly defined in normative terms Political belonging comes to be equated with specific norms values and appropriate behaviour with distinctions made between virtuous desirable citizens and deviant undesirable ones In this book we analyze the formulation implementation and contestation of such normative framings of citizenship which we term citizenship agendas Some of these agendas are part and parcel of the working of the nation state Other citizenship agendas however are produced beyond the nation state The chapters in this book study various sites where the meaning of the good citizen is framed and negotiated in different ways by state and non state actors We explore how multiple normative framings of citizenship may coexist in apparent harmony or merge or clash The different chapters in this book engage with citizenship agendas in a range of contexts from security policies and social housing in Dutch cities to state like but extralegal organizations in Jamaica and Guatemala and from the regulation of the Muslim call to prayer in the US Midwest to post conflict reconstruction in Lebanon This book was previously published as a special issue of *Citizenship Studies*

**Beyond the State** Daniel Tarschys, 1972 Reports of Cases Determined by the Supreme Court of the State of Missouri Missouri Supreme Court, 1911 The Dimensions of Global Citizenship Darren J. O'Byrne, 2004-11-23 *The Dimensions of Global Citizenship* takes issue with the assumption that ideas about global citizenship are merely Utopian ideals The author argues that far from being a modern phenomenon world citizenship has existed throughout history as a radical alternative to the inadequacies of the nation state system Only in the post war era has this ideal become politically meaningful This social transformation is illustrated by references to the activities of global social movements as well as those of individual citizens
