by imbuing the space with sacred power that would avert disaster Johnson traces such magico religious conceptions of potency and space from historical records through present day popular religious practice and draws parallels between these and secular attempts at urban revitalization Through a detailed ethnography of the contested ways in which academics urban activists spirit mediums and architects seek to revitalize the flagging economy and infrastructure of Chiang Mai Johnson finds that alongside the hope for progress there exists a discourse about urban ghosts deadly construction sites and the lurking anxiety of another possible crash a discourse that calls into question history s upward trajectory In this way Ghosts of the New City draws new connections between urban history and popular religion that have implications far beyond Southeast Asia

Government Gazette ,1911      **The Ancient City** John Martin Woolsey,1911      **Chiang Mai between Empire and Modern Thailand** Taylor M. Easum,2025-10-01 Urban histories tend to be dominated by large global cities But what does the history of the modern colonial era look like from the perspective of smaller cities By shifting the focus from the metropolis to the secondary city of Chiang Mai this study provides an alternative narrative of the formation of the modern Thai state that highlights the overlap between European American and Siamese interests Through a detailed analysis of Chiang Mai s urban space the power dynamics that shaped the city come into focus as an urban scale manifestation of colonial forces albeit an incomplete one that allowed sacred space to become a source of conflict that was only resolved in the years before WWII Today as the city confronts the challenge of overdevelopment the legacy of the colonial era and the opportunity of heritage preservation this deep multi layered history of the power of and over urban space is vital
