Chicago~the City in a Garden Iverson Foundation, 1990 *A City in Blue and Green* Peter G. Rowe, Limin Hee, 2019-08-30 This open access book highlights Singapore's development into a city in which water and greenery along with associated environmental technical social and political aspects have been harnessed and cultivated into a liveable sustainable way of life It is also a story about a unique and thoroughgoing approach to large scale and potentially transferable water sustainability within largely urbanized circumstances which can be achieved along with complementary roles of environmental conservation ecology public open space management and the greening of buildings together with infrastructural improvements Reimagining the More-Than-Human City Jamie Wang, 2024-10-01 An exploration of the multifaceted urban

environmental issues in Singapore through a more than human lens calling for new ways to think of and story cities As climate change accelerates and urbanization intensifies our need for more sustainable and livable cities has never been more urgent Yet the imaginary of a flourishing urban ecofuture is often driven by a specific version of sustainability that is tied to both high tech futurism and persistent economic growth What kinds of sustainable futures are we calling forth and at what and whose expense In *Reimagining the More Than Human City* Jamie Wang attempts to answer these questions by critically examining the sociocultural political ethical and affective facets of human environment dynamics in the urban nexus with a geographic focus on Singapore Widely considered a model for the future of urbanism and an emblematic new world city Singapore Wang contends is a fascinating site to explore how modernist sustainable urbanism is imagined and put into practice Drawing on field research this book explores distinct and intrarelated urban imaginaries situated in various sites from the futuristic authoritarian Supertree Grove positioned as a technologically sustainable solution to a velocity charged and singular urban transportation system to highly protected nature reserves and to the cemeteries where graves and

memories continue to be exhumed and erased to make way for development Wang also attends to more contingent yet hopeful alternatives that aim to reconfigure current urban approaches In the face of growing enthusiasm for building high tech sustainable and natural cities Wang ultimately argues that urban imaginings must create space for a more relational understanding of urban environments
