## **Calcium And Contractility Smooth Muscle:**

Calcium and Contractility A. K. Grover, E. E. Daniels, 2012-12-06 In organizing the present volume we had two intentions The first was to present the best current understanding of the mechanisms of calcium mobilization during excitation contraction coupling of smooth muscle at a level suited to the needs of professionals interested in smooth muscle pharmacology and pathophysiology while remaining appreciable by graduate and medical students The second intention was to provide insight into present day controversies as well as the latest advances achieved by researchers in this field Thus we have thoroughly discussed both the techniques and the concepts derived from their application An attempt has also been made here to answer a number of profoundly important questions What are the mechanisms and agents responsible for the control of contractility What are the accompanying changes in the state of intracellular calcium ions and the mechanisms responsible for them How does the regulation of contractility occur directly at the level of the actomyosin activity What role do gap junctions play in cell to cell coupling What are the roles of cholinergic adrenergic peptidergic and nonadrenergic noncholinergic interactions in calcium mobilization in smooth muscle What changes occur in hypertension The impact of these recent techniques on future research is also reflected upon
