[The Archetypal Significance of Gilgamesh: A Modern Ancient Hero](#) Rivkah Schärf Kluger, It was at the instigation of C G Jung that Dr Kluger undertook the interpretation of the Gilgamesh Epic the oldest known epic myth A classic in world literature it originated in the Sumero Babylonian culture a vital root of modern Western civilization Rich in poetic imagery and archetypal content it has not lost its meaning for modern man In this book based primarily on her seminars at the Zurich Jung Institute Dr Kluger deals with the psychological significance of the hero king's fateful adventures from his building of the city walls to his travel to the Babylonian Noah in search of immortality for which her expertise in the fields of comparative religion and Jungian psychology uniquely fit her In her vivid yet scholarly presentation she brings alive the implications of the fascinating episodes of this myth both on a personal and on a collective level the changes of individual consciousness and its reactions to unconscious archetypal

contents the evolving process of individuation and the development of religion Using modern dreams and examples from analytic practice she shows the relevance of this ancient myth for today s world and its concerns from sexuality and homosexuality the role of the feminine and the still living goddess Ishtar to the current spiritual search of contemporary mankind

On Heroes, Hero-worship and the Heroic in History Thomas Carlyle,1894 **The American Shorthorn Herd Book** ,1903 **Teutonic Mythology and Legend: Gods and Goddesses of the Northland And The Magic of the Middle Ages (Complete)** Viktor Rydberg,Donald Alexander Mackenzie,1907-01-01 Already at the beginning of the Christian era the name Germans was applied by the Romans and Gauls to the many clans of people whose main habitation was the extensive territory east of the Rhine and north of the forest clad Hercynian Mountains That these clans constituted one race was evident to the Romans for they all had a striking similarity in type of body moreover a closer acquaintance revealed that their numerous dialects were all variations of the same parent language and finally they resembled each other in customs traditions and religion The characteristic features of the physical type of the Germans were light hair blue eyes light complexion and tallness of stature as compared with the Romans Even the saga men from whom the Roman historian Tacitus gathered the facts for his Germania an invaluable work for the history of civilisation knew that in the so called Svevian Sea north of the German continent lay another important part of Germany inhabited by Sviones a people divided into several clans Their kinsmen on the continent described them as rich in weapons and fleets and in warriors on

land and sea Tac Germ 44 This northern sea girt portion of Germany is called Scandinavia Scandea by other writers of the Roman Empire and there can be no doubt that this name referred to the peninsula which as far back as historical monuments can be found has been inhabited by the ancestors of the Swedes and the Norwegians I therefore include in the term Germans the ancestors of both the Scandinavian and Gothic and Germanic peoples Science needs a sharply defined collective noun for all these kindred branches sprung from one and the same root and the name by which they make their first appearance in history would doubtless long since have been selected for this purpose had not some of the German writers applied the terms German and Deutsch as synonymous This is doubtless the reason why Danish authors have adopted the word Goths to describe the Germanic nation But there is an important objection to this in the fact that the name Goths historically is claimed by a particular branch of the family that branch namely to which the East and West Goths belonged and in order to avoid ambiguity the term should be applied solely to them It is therefore necessary to re adopt the old collective name even though it is not of Germanic origin the more so as there is a prospect that a more correct use of the words German and Germanic is about to prevail in Germany itself for the German scholars also feel the weight of the demand which science makes on a precise and rational terminology It is universally known that the Teutonic dialects are related to the Latin the Greek the Slavic and Celtic languages and that the kinship extends even beyond Europe to the tongues of Armenia Irania and India The holy books ascribed to Zoroaster which to the priests of Cyrus and Darius were what the Bible is to us Rigveda s hymns which to the people dwelling on the banks of the Ganges are God s revealed word are written in a language which points to a common origin with our own However unlike all these kindred tongues may have grown with the lapse of thousands of years still they remain as a sharply defined group of older and younger sisters as compared with all other language groups of the world Even the Semitic languages are separated therefrom by a chasm so broad and deep that it is hardly possible to bridge it This language group of ours has been named in various ways It has been called the Indo Germanic the Indo European and the Aryan family of tongues I have adopted the last designation The Armenians Iranians and Hindoos I call the Asiatic Aryans all the rest I call the European Aryans Certain it is that these sister languages have had a common mother the ancient Aryan speech and that this has had a geographical centre from which it has radiated By such an ancient Aryan language cannot of course be meant a tongue stereotyped in all its inflections like the literary languages of later times but simply the unity of those dialects which were spoken by the clans dwelling around this centre of radiation By comparing the grammatical structure of all the daughters of this ancient mother and by the aid of the laws hitherto discovered in regard to the transition of sounds from one language to another attempts have been made to restore this original tongue which many thousand years ago ceased to vibrate These attempts cannot of course in any sense claim to reproduce an image corresponding to the lost original as regards syntax and inflections Such a task would be as impossible as to reconstruct on the basis of all the now spoken languages derived from the Latin the dialect used in Latium The purpose

is simply to present as faithful an idea of the ancient tongue as the existing means permit In the most ancient historical times Aryan speaking people were found only in Asia and Europe In seeking for the centre and the earliest conquests of the ancient Aryan language the scholar may therefore keep within the limits of these two continents and in Asia he may leave all the eastern and the most of the southern portion out of consideration since these extensive regions have from prehistoric times been inhabited by Mongolian and allied tribes and may for the present be regarded as the cradle of these races It may not be necessary to remind the reader that the question of the original home of the ancient Aryan tongue is not the same as the question in regard to the cradle of the Caucasian race The white race may have existed and may have been spread over a considerable portion of the old world before a language possessing the peculiarities belonging to the Aryan had appeared and it is a known fact that southern portions of Europe such as the Greek and Italian peninsulas were inhabited by white people before they were conquered by Aryans When the question of the original home of the Aryan language and race was first presented there were no conflicting opinions on the main subject All who took any interest in the problem referred to Asia as the cradle of the Aryans Asia had always been regarded as the cradle of the human race In primeval time the yellow Mongolian the black African the American redskin and the fair European had there tented side by side From some common centre in Asia they had spread over the whole surface of the inhabited earth Traditions found in the literatures of various European peoples in regard to an immigration from the East supported this view The progenitors of the Romans were said to have come from Troy The fathers of the Teutons were reported to have immigrated from Asia led by Odin There was also the original home of the domestic animals and of the cultivated plants And when the startling discovery was made that the sacred books of the Iranians and Hindoos were written in languages related to the culture languages of Europe when these linguistic monuments betrayed a wealth of inflections in comparison with which those of the classical languages turned pale and when they seemed to have the stamp of an antiquity by the side of which the European dialects seemed like children then what could be more natural than the following conclusion The original form has been preserved in the original home the farther the streams of emigration got away from this home the more they lost on the way of their language and of their inherited view of the world that is of their mythology which among the Hindoos seemed so original and simple as if it had been watered by the dews of life s dawn To begin with there was no doubt that the original tongue itself the mother of all the other Aryan languages had already been found when Zend or Sanscrit was discovered Fr v Schlegel in his work published in 1808 on the Language and Wisdom of the Hindoos regarded Sanscrit as the mother of the Aryan family of languages and India as the original home of the Aryan family of peoples Thence it was claimed colonies were sent out in prehistoric ages to other parts of Asia and to Europe nay even missionaries went forth to spread the language and religion of the mother country among other peoples Schlegel s compatriot Link looked upon Zend as the oldest language and mother of Sanscrit and the latter he regarded as the mother of the rest and as the Zend in his opinion was spoken in Media and surrounding countries it followed

that the highlands of Media Armenia and Georgia were the original home of the Aryans a view which prevailed among the leading scholars of the age such as Anquetil Duperron Herder and Heeren and found a place in the historical text books used in the schools from 1820 to 1840 Since Bopp published his epoch making Comparative Grammar the illusion that the Aryan mother tongue had been discovered had of course gradually to give place to the conviction that all the Aryan languages Zend and Sanscrit included were relations of equal birth This also affected the theory that the Persians or Hindoos were the original people and that the cradle of our race was to be sought in their homes On the other hand the Hindooic writings were found to contain evidence that during the centuries in which the most of the Rigveda songs were produced the Hindooic Aryans were possessors only of Kabulistan and Pendschab whence either expelling or subjugating an older black population they had advanced toward the Ganges Their social condition was still semi nomadic at least in the sense that their chief property consisted in herds and the feuds between the clans had for their object the plundering of such possessions from each other Both these facts indicated that these Aryans were immigrants to the Indian peninsula but not the aborigines wherefore their original home must be sought elsewhere The strong resemblance found between Zend and Sanscrit and which makes these dialects a separate subdivision in the Aryan family of languages must now since we have learned to regard them as sister tongues be interpreted as a proof that the Zend people or Iranians and the Sanscrit people or Hindoos were in ancient times one people with a common country and that this union must have continued to exist long after the European Aryans were parted from them and had migrated westwards When then the question was asked where this Indo Iranian cradle was situated the answer was thought to be found in a chapter of Avesta to which the German scholar Rhode had called attention already in 1820 To him it seemed to refer to a migration from a more northerly and colder country The passage speaks of sixteen countries created by the fountain of light and goodness Ormuzd Ahura Mazda and of sixteen plagues produced by the fountain of evil Ahriman Angra Mainyu to destroy the work of Ormuzd The first country was a paradise but Ahriman ruined it with cold and frost so that it had ten months of winter and only two of summer The second country in the name of which Sughda Sogdiana was recognised was rendered uninhabitable by Ahriman by a pest which destroyed the domestic animals Ahriman made the third which by the way was recognised as Merv impossible as a dwelling on account of never ceasing wars and plunderings In this manner thirteen other countries with partly recognisable names are enumerated as created by Ormuzd and thirteen other plagues produced by Ahriman Rhode s view that these sixteen regions were stations in the migration of the Indo Iranian people from their original country became universally adopted and it was thought that the track of the migration could now be followed back through Persia Baktria and Sogdiana up to the first region created by Ormuzd which accordingly must have been situated in the interior highlands of Asia around the sources of the Jaxartes and Oxus The reason for the emigration hence was found in the statement that although Ormuzd had made this country an agreeable abode Ahriman had destroyed it with frost and snow In other words this part of Asia was supposed to

have had originally a warmer temperature which suddenly or gradually became lower wherefore the inhabitants found it necessary to seek new homes in the West and South
