Visions of the Real Alexandru Calcatinge,2011 The cultural landscape is what lies around us and has to be understood and learned to deal with The best way to do this is to start from the beginning in order to understand the contemporary iterations of the concept We will not reinvent the concept but we will try to create a new way to see it The operative concept of cultural landscape is part of a reality that is seen and visioned differently by each individual This means that the concept has an almost infinite number of meanings Thus this book presents some of the visions of the surrounding reality through the eyes of an architect
