Imperial Women Susan E. Wood, 2000-01-01 An examination of the portraits of female members of Rome's ruling family from the end of the republic when such images first appear through the end of the Julio-Claudian dynasty [The Routledge Companion to Global Renaissance Art](#) Stephen J. Campbell, Stephanie Porras, 2024-01-22 This companion examines the global Renaissance through object-based case studies of artistic production from Africa, Asia, the Americas, and Europe in the early modern period. The international group of contributors take an art-historical approach characterized by close analysis of form and meaning as well as function and a focus on questions of cross-cultural dialogue and adaptation. Seeking to de-emphasize the traditional focus on Europe, this book is a critical guide to the literature and the state of the field. Chapters outline new questions and agendas while pushing beyond familiar material. Main themes include workshops, the migrations of artists, objects, technologies, diplomatic gifts, imperial ideologies, ethnicity, and indigeneity, sacred spaces, and image cults, as well as engaging with the open questions of the Renaissance and the global. This will be a useful and important resource for researchers and students alike and will be of interest to scholars working in art history, visual culture, material culture, and Renaissance studies. Dobler, 1988 *Applied Geoinformatics for Sustainable Integrated Land and Water Resources Management (ILWRM) in the Brahmaputra River basin* Nayan Sharma, Wolfgang-Albert Flügel, 2015-01-29 The central theme of this book is focused on the analyses and the results which emerged from the international research project BRAHMATWINN sponsored by European Commission EC and conducted during 2006-2009. The book highlights the achievements of BRAHMATWINN to carry out a harmonised integrated water resources management (IWRM) approach as addressed by the European Water Initiative (EWI) in headwater river systems of alpine mountain massifs. The latter are already impacted from climate change and the BRAHMATWINN project established transfer of professional IWRM expertise, approaches, and tools based on case studies carried out in twinning European and Asian river basins. The project addresses all important IWRM issues in a balanced way including conflict resolution in the trans-boundary Danube and Brahmaputra River Basins in Europe and South Asia, respectively. This book will be useful to researchers, professionals, managers, and decision makers associated with study and application of sustainable integrated land and water resources management (ILWRM) in the backdrop of climate change.
