Boy Who Invented Television:

The Boy who Invented Television Paul Schatzkin,2002 While the great minds of science financed by the biggest companies in the world wrestled with 19th century answers to a 20th century problem Philo T Farnsworth age 14 dreamed of trapping light in an empty jar and transmitting it one line at a time on a magnetically deflected beam of electrons Farnsworth was a farm boy from Rigby Idaho with virtually no knowledge of electronics when he first sketched his idea for electronic television on a blackboard for his high school science teacher Fifteen years later his teacher would recreate that sketch as part of his testimony in patent litigation between Farnsworth and the giant Radio Corporation of America In 1930 Farnsworth was awarded the fundamental patents for modern television but he had to spend the next decade fighting off challenges to his patents by the giant Radio Corporation of America and defending his vision against his own shortsighted investors who did not share his larger dream of scientific independence *The Boy Who Invented Television* traces Farnsworth s guided tour of discovery describing the observations he made in the course of developing and improving his initial invention and revealing how his unique insights brought him to the threshold of what could have been an even greater discovery clean safe and unlimited energy from controlled nuclear fusion Publisher **The Boy Who Invented TV** Kathleen Krull,2009-09-08 An inspiring true story of a boy genius Plowing a potato field in 1920 a 14 year old farm boy from Idaho saw in the parallel rows of overturned earth a way to make pictures fly through the air This boy was not a magician he was a scientific genius and just eight years later he made his brainstorm in the potato field a reality by transmitting the world s first television image This fascinating picture book biography of Philo Farnsworth covers his early interest in machines and electricity leading up to how he put it all together in one of the greatest inventions of the 20th century The author s afterword discusses the lawsuit Farnsworth waged and won against RCA when his high school science teacher testified that Philo s invention of television was years before RCA s **The Man Who Invented Television** Edwin Brit Wyckoff,2013-07-01 Philo Taylor Farnsworth was an American inventor and television pioneer Although he made many contributions that were crucial to the early development of all electronic television he is best known for inventing the first fully functional and complete all electronic television system and for being the first person to demonstrate such a system to the public Who Invented Television? Philo Farnsworth Mary Kay Carson,2012-01-01 It seems like televisions are everywhere but do you know who invented the first one Readers learn about Philo Farnsworth s life and how he invented the first television They ll create their own cartoon show too *Much Ado about Almost Nothing* Hans Camenzind,2007 A history of electricity and electronics and how the electron at first bothered mankind then gradually became useful and now dominates our lives Philo Farnsworth and the Television Ellen Sturm Niz,2007 Tells the story of how Philo Farnsworth came up with the idea for electronic television at age 14 and later developed his idea into the technology for television that is still used today Written in graphic novel format The Boy Genius and the Mogul Daniel Stashower,2002-05-07 The world remembers Edison Ford and the Wright Brothers

But what about Philo T Farnsworth the inventor of television an innovation that did as much as any other to shape the twentieth century That question lies at the heart of *The Boy Genius and the Mogul* Daniel Stashower's captivating chronicle of television's true inventor the battle he faced to capitalize on his breakthrough and the powerful forces that resulted in the collapse of his dreams The son of a Mormon farmer Farnsworth was born in 1906 in a single room log cabin on an isolated homestead in Utah The Farnsworth family farm had no radio no telephone and no electricity Yet motivated by the stories of scientists and inventors he read about in the science magazines of the day young Philo set his sights on becoming an inventor By his early teens Farnsworth had become an inveterate tinkerer able to repair broken farm equipment when no one else could It was inevitable that when he read an article about a new idea for the transmission of pictures by radio waves that he would want to attempt it himself One day while he was walking through a hay field Farnsworth took note of the straight parallel lines of the furrows and envisioned a system of scanning a visual image line by line and transmitting it to a remote screen He soon sketched a diagram for an early television camera tube It was 1921 and Farnsworth was only fourteen years old Farnsworth went on to college to pursue his studies of electrical engineering but was forced to quit after two years due to the death of his father Even so he soon managed to persuade a group of California investors to set him up in his own research lab where in 1927 he produced the first all electronic television image and later patented his invention While Farnsworth's invention was a landmark it was also the beginning of a struggle against an immense corporate power that would consume much of his life That corporate power was embodied by a legendary media mogul RCA President and NBC founder David Sarnoff who claimed that his chief scientist had invented a mechanism for television prior to Farnsworth's Thus the boy genius and the mogul were locked in a confrontation over who would control the future of television technology and the vast fortune it represented Farnsworth was enormously outmatched by the media baron and his army of lawyers and public relations people and by the 1940s Farnsworth would be virtually forgotten as television's actual inventor while Sarnoff and his chief scientist would receive the credit Restoring Farnsworth to his rightful place in history *The Boy Genius and the Mogul* presents a vivid portrait of a self taught scientist whose brilliance allowed him to capture light in a bottle A rich and dramatic story of one man's perseverance and the remarkable events leading up to the launch of television as we know it *The Boy Genius and the Mogul* shines new light on a major turning point in American history

The Women Who Made Television Funny David C. Tucker, 2015-03-26 Most of the bright and talented actresses who made America laugh in the 1950s are off the air today but their pioneering Hollywood careers irrevocably changed the face of television comedy These smart and sassy women successfully negotiated the hazards of the male dominated workplace with class and humor and the work they did in the 1950s is inventive still by today's standards Unable to fall back on strong language shock value or racial and sexual epithets the female sitcom stars of the 1950s entertained with pure talent and screen savvy As they did so they helped to lay the foundation for the development of television comedy This book pays tribute to 10 prominent television

actresses who played lead roles in popular comedy shows of the 1950s Each chapter covers the works and personalities of one actress Lucille Ball I Love Lucy Gracie Allen The George Burns and Gracie Allen Show Eve Arden Our Miss Brooks Spring Byington December Bride Joan Davis I Married Joan Anne Jeffreys Topper Donna Reed The Donna Reed Show Ann Sothorn Private Secretary and The Ann Sothorn Show Gale Storm My Little Margie and The Gale Storm Show Oh Susanna and Betty White Life with Elizabeth For each star a career sketch is provided concentrating primarily on her television work but also noting achievements in other areas Appendices offer cast and crew lists a chronology and an additional biographical sketch of 10 less familiar actresses who deserve recognition
