Darley, 1967 *Brain Mechanisms Underlying Speech and Language*, 1967 *Learning Disabilities and Brain Function* William H. Gaddes, Dorothy Edgell, 2013-03-14 The present edition of this book is a revision and expansion of the first two editions which appeared in 1980 and 1985 and in German translation in 1991 More than half of the present volume includes new material and what has been retained from the former editions has been largely rewritten and updated with new research findings A completely new chapter has been added on Attention Deficit Disorder The author of the earlier editions W H G has been joined by a coauthor D E and their combined elementary high school and university teaching and clinical experience totals approximately seventy five years Both of us have directed our professional energies to understanding the puzzle of human learning especially academic learning of those students who despite apparently normal intelligence and opportunity have varying degrees of difficulty in acquiring ideas and skills that are easily mastered by others Until about fifty years ago there was a common tendency to equate academic success with intelligence and those students who could not meet the demands of the prescribed program were usually required to repeat the same grade with a repetition of the same discouraging treatment that had been unsuccessful the first time *Psychophysiological Aspects of Reading and Learning* Victor M. Rentel, Samuel A. Corson, Bruce R. Dunn, 2017-11-01 Bringing together neurological assessments of reading and cognition this provocative volume originally published in 1985 presents eight major and sometimes controversial studies on the parts and patterns of the reading process With comprehensive coverage ranging from psycholinguistics and education to neurophysiology these studies highlight new directions in the field at the time The contributors support an interactive rather than dichotomous model of brain function and stress individual differences in assessing reading and cognitive skills

**Language Learning by a Chimpanzee** Duane M Rumbaugh, 2014-05-10 Language Learning by a Chimpanzee The Lana Project brings together several disciplinary endeavors such as primatology experimental psychology cognitive psychology computer and information sciences and neurosciences This book is composed of two sets of data one relates to language learning in the chimpanzee while the other deals with language construction by Homo sapiens The fundamental issue of mind brain dualism and difference between man and beast are also covered This text mainly describes the LANA project that aims to develop a computer based language training system for investigation into the possibility that chimpanzees may have the capacity to acquire human type language This publication is recommended for biologists specialists and researchers
