specialist and a clinical psychologist with neurobiology expertise team up to explore the brain science behind parenting In
this groundbreaking exploration of the brain mechanisms behind healthy caregiving attachment specialist Daniel A Hughes
and veteran clinical psychologist Jonathan Baylin guide readers through the intricate web of neuronal processes hormones
and chemicals that drive and sometimes thwart our caregiving impulses uncovering the mysteries of the parental brain The
biggest challenge to parents Hughes and Baylin explain is learning how to regulate emotions that arise feeling them deeply
and honestly while staying grounded and aware enough to preserve the parent child relationship Stress which can lead to
blocked or dysfunctional care can impede our brain s inherent caregiving processes and negatively impact our ability to do
this While the parent child relationship can generate deep empathy and the intense motivation to care for our children it can
also trigger self defensive feelings rooted in our early attachment relationships and give rise to unparental impulses Learning
to be a good parent is contingent upon learning how to manage this stress understand its brain based cues and respond in a
way that will set the brain back on track To this end Hughes and Baylin define five major systems of caregiving as they re
linked to the brain explaining how they operate when parenting is strong and what happens when good parenting is
compromised or blocked With this awareness we learn how to approach kids with renewed playfulness acceptance curiosity
and empathy re regulate our caregiving systems foster deeper social engagement and facilitate our children s development
Infused with clinical insight illuminating case examples and helpful illustrations Brain Based Parenting brings the science of
caregiving to light for the first time Far from just managing our children s behavior we can develop our parenting brains and
with a better understanding of the neurobiological roots of our feelings and our own attachment histories we can transform a
fraught parent child relationship into an open regulated and loving one **The Making of the Body** Mrs. S. A.
