Curriculum Design:

Introduction to Curriculum Design in Gifted Education Kristen R. Stephens, Frances A. Karnes, 2021-09-03 Gifted students require a curriculum that intentionally aligns with their advanced abilities to ensure engagement at the appropriate level of intensity and depth Introduction to Curriculum Design in Gifted Education offers an in depth exploration of curriculum development for the gifted Included are the general foundations of good curriculum design a survey of curriculum models appropriate for gifted learners an examination of design considerations across content areas a detailed analysis of the role assessment has in the curriculum development process and an exploration of trends and future directions of curriculum development for the gifted Each chapter is authored by experts with considerable knowledge pertaining to curriculum implications for gifted students and is written with the practitioner in mind to facilitate effective implementation This text is an essential addition to the library of any educator seeking to create new and or adapt existing curriculum to better address the interests and abilities of gifted students Place-based Curriculum Design Amy B. Demarest, 2014-10-30 Place based Curriculum Design provides pre service and practicing teachers both the rationale and tools to create and integrate meaningful place based learning experiences for students Practical classroom based curricular examples illustrate how teachers can engage the local and still be accountable to the existing demands of federal state and district mandates Coverage includes connecting the curriculum to students outside of school lives using local phenomena or issues to enhance students understanding of discipline based questions engaging in in depth explorations of local issues and events to create cross disciplinary learning experiences and creating units or sustained learning experiences aimed at engendering social and environmental renewal An on line resource www.routledge.com/9781138013469 provides supplementary materials including curricular templates tools for reflective practice and additional materials for instructors and students *Curriculum Design* Dr. Rakesh Gupta, 2020-09-03 Curriculum Design may be defined as a strategic process of informed and deliberate construction of learning opportunities to enable learners to achieve the appropriate level and scope of discipline skills knowledge and understanding on completion of a unit of study The curriculum should be broad based so as to accommodate the needs of varied categories of pupils so that they are able to take up subjects and participate in activities according their capacities and interests The book covers Modern Concept of the Curriculum Basic Guideline for Curriculum Construction Contest Selection and Expansion Curriculum Old and New Concepts Mechanics of Curriculum Planning Undergraduate Preparation of Professional Preparation **The Learner-Centered Curriculum** Roxanne Cullen, Michael Harris, Reinhold R. Hill, 2012-02-03 THE LEARNER CENTERED CURRICULUM If an institution is to be truly learner centered all processes and practices need to be learner centered and the curriculum is no exception From the Preface The Learner Centered Curriculum is for educators and administrators who envision an educational environment that produces students who are creative and autonomous learners By encouraging an appreciation and adoption of learner centered practices educators can

transform their curricula to become more focused on the learner. The book presents a framework for curriculum design based on learner centered principles while at the same time offering technical advice on implementation as well as the strategic use of assessment technology and physical spaces to support innovative design. The authors include several examples of existing curricula that illustrate their framework in practice. Throughout the book they emphasize the need for assessment both formative and summative stressing the point that assessment is an effective driver of change. The book includes a wide variety of options both for individual classroom practice and for programmatic assessment. The Learner Centered Curriculum explores the current technology and tools available to educators that can support learner centered practices and foster autonomous learning and demonstrates how technology can assist in removing some of the obstacles to achieving a learner centered design. In addition the authors explain the importance of physical spaces in relation to learner centered curricular design and show how to tie renovation to curricular implementation to foster incentive to innovate and provide a physical manifestation of learner centered principles.

Designing Instructional Systems A J Romiszowski, 2016-01-08 This book deals with large scale or macro level instructional design which is referred to by other authors variously as curriculum development course design training system design or instructional systems design. The emphasis throughout the book is on the application of a systems approach which implies both a way of thinking about the problem and a methodology for seeking and developing solutions. Thus the approach of the book is problem oriented. The successful problem solver requires more than a technique or procedure. He requires experience of similar problems some general principles that he can apply to the class of problems and a great deal of creativity to develop an optimal method of solving each problem. This book brings together the theories and practical experience that have been built up by instructional technologists over the last two decades the techniques that are currently most used for the analysis of problems in education and for their solution and a range of new ideas specially developed by the author to encourage the creative element so often missing from educational materials. This book is intended for anyone involved in instructional design. It is designed on a grid structure to facilitate the reader's choice of chapters. Those who wish to gain a general overview may concentrate on the chapters at the theory base and analysis levels. Those more practically concerned with course design will find much of use in the synthesis and evaluation levels. Those who wish simply to discover what's new in this book and its treatment of instructional design will find what they are seeking principally in the analysis and evaluation levels.

Transformative Curriculum Design in Health Sciences Education Halupa, Colleen, 2015-04-30 A crucial element in ensuring patient safety and quality of care is the proper training of the next generation of doctors nurses and healthcare staff. To effectively serve their students health science educators must first prepare themselves with competencies in pedagogy and curriculum design. Transformative Curriculum Design in Health Sciences Education provides information for faculty to learn how to translate technical competencies in medicine and healthcare into the development of both traditional and online learning environments. This book serves as a reference for

health sciences undergraduate and graduate faculty interested in learning about the latest health sciences educational principles and curriculum design practices This critical reference contains innovative chapters on transformative learning curriculum design and development the use of technology in healthcare training through hybrid and flipped classrooms specific pedagogies interprofessional education and more

Getting Started with Rigorous Curriculum Design Larry Ainsworth,2013 School districts are now successfully implementing the Rigorous Curriculum Design process to redesign their curricula to fulfill the promise of the Common Core and prepare students for success on the coming national assessments Each chapter of Getting Started With Rigorous Curriculum Design will provide educators with collective wisdom insights and ideas to enrich and expand understandings they may not have yet come to on their own

Ensuring High-Quality Curriculum Angela Di Michele Lalor,2016-11-10 We know that curriculum is the core of the classroom experience but what makes a quality curriculum How can educators be sure that what they teach is strongly aligned to the specific standards that their district or school has adopted What kinds of lessons learning experiences and assessments are most effective and how should they be embedded within the curriculum You ll find the answers to these and many other questions in this definitive step by step guide to curriculum design and evaluation Drawing from her work with teachers and administrators to facilitate curriculum development Angela Di Michele Lalor offers targeted advice and real life examples from elementary and secondary units of study across a variety of content areas and standards as well as field tested rubrics protocols and other tools She provides criteria for evaluating each component of a curriculum and end of chapter checklists to help you ensure that the criteria are met Relevant to anyone who is creating or revising curriculum or evaluating options among published alternatives Ensuring High Quality Curriculum is a comprehensive and accessible roadmap to developing a solid foundation for teaching and learning and better results in the classroom

Curriculum, Design, and Development David Pratt,1980 *A Curriculum Design Manual for Theological Education* LeRoy Ford,2003-02-26 Features of A Curriculum Design Manual for Theological Education A Learning Outcomes Focus by LeRoy Ford Fifteen complete descriptions for courses in various disciplines of theological education All descriptions are in the learning outcomes format A complete set of goals and objectives upon which each chapter is based These statements when combined with the goals and objectives for the manual itself constitute a complete description for a course in Curriculum Design in Theological Education Guidelines for elaborating the essential elements of curriculum design institutional purpose program division and department purposes scope educational goals and objectives for learners multiple contexts methodology and instructional and administrative models Four hundred learning outcomes at the level of meaningful performance An emphasis on making spiritual formation part of every course in the curriculum plan Three essentials for the learning outcomes approach a statement of goals and objectives use of appropriate methods and activities and development and use of appropriate testing and evaluation procedures An emphasis on the multiple contexts which constitute an element of curriculum design Twenty

questions which designers must confront in considering the role of affective goals and objectives in curriculum design in theological education

Curriculum to Classroom: A Handbook to Prompt Thinking Around Primary Curriculum Design and Delivery Lekha Sharma, 2020-10-08

Curriculum to Classroom is the ideal book for senior leaders and curriculum leads who are in the process of establishing, refining and reviewing their school curriculum. It provides an overview of the curriculum design and delivery process in the Primary phase in its entirety. It also provides research-based evidence, practical examples and short, medium and long-term solutions for your school in light of the 2014 National Curriculum, as well as expert opinions from a number of renowned educators on different elements of the curriculum, including creating a powerful and ambitious vision for your school's curriculum, intent, how to promote character development, how best to support and empower subject leads, and the fundamental building blocks in terms of implementation of the curriculum. This book will enable you to consider the many facets of curriculum design and support strategic decision-making so your curriculum is meeting and exceeding the expectations of the National Curriculum, as well as being unique and bespoke to your school community. An easy-to-read handbook to prompt thinking and reflections on your school's curriculum and provide practical tools and strategies to take it forward.

Handbook of Curriculum Design for Individualized Instruction Sidney J. Drumheller, 1971

Abstract

Precise guidelines for the design and development of individualized instruction curriculum materials from rigorously defined behavioral objectives are presented. With the guidelines, an educator can identify all objectives appropriate for an instructional unit, define a procedure to order the objectives into an educational sequence, and determine how to communicate specifications to teachers and curriculum writers. The Drumheller Model is based on the Bloom Taxonomy of Educational Objectives. Exercises are included.

Curriculum Planning with Design Language Ken Badley, 2018-09-03

Curriculum Planning with Design Language provides a streamlined, adaptable framework for using visual design terminology to conceptualize instructional design objectives, processes, and strategies. Drawing from instructional design theory, pattern language theory, and aesthetics, these ten course and unit design principles help educators break down and clarify their broader planning tasks and concerns. Written in clear, direct prose and rich with intuitive examples, this book showcases insights leading to effective curriculum design that will speak equally to pre-service and experienced educators.

Five Essential Dimensions of Curriculum Design Robert R. Gower, Marvin B. Scott, 1977

Rigorous Curriculum Design Larry Ainsworth, 2011-04-16

The need for a cohesive and comprehensive curriculum that intentionally connects standards, instruction, and assessment has never been more pressing. For educators to meet the challenging learning needs of students, they must have a clear road map to follow throughout the school year. *Rigorous Curriculum Design* presents a carefully sequenced, hands-on model that curriculum designers and educators in every school system can follow to create a progression of units of study that keeps all areas tightly focused and connected.

The Routledge Handbook of

Language Education Curriculum Design Peter Mickan, Ilona Wallace, 2019-12-23 Curriculum design options cover a continuum from regional and school based programs to national and international frameworks How does policy speak to practice What have teacher researchers discovered through in classroom studies Where do you begin to describe or measure effective language education curriculum design The Routledge Handbook of Language Education Curriculum Design presents a comprehensive collection of essays on these issues by 31 established practitioners and new researchers Informed by experienced scholarship and fresh studies this handbook shares international perspectives on language education from policy and curriculum to teacher training and future directions The handbook addresses language education curriculum design across five sections Language curriculum design perspectives policies and practices Designs across the curriculum Curriculum designs in language education Curriculum resources evaluation and assessment Teacher education research and future projects With contributions from Australia Brazil Indonesia Switzerland Timor Leste and more the handbook represents the breadth of research into and the global implications for sound language education curriculum design It considers equally the needs of students and policy makers from urban metropolises and remote communities It is designed to reinvigorate discussions about education policy curriculum management and the role of teacher researchers *Curriculum Design, Evaluation, and Teaching in Medical Education* Jochanan Benbassat, 2024-12-06 This concise and challenging examination of medical education aims to discuss curriculum design and evaluation in medical schools and to take a fresh look at current trends in patient care and continuing education teaching methods The ideas and insights provided here are based on the author's long career in clinical practice and teaching medical students and residents Medical education is no exception to the changes at every level in medicine For example the ready access to medical information via the Internet and other media has produced smarter and informed patients Multi specialty hospital practice has replaced the individual doctor patient relationship perhaps compromising patient care to some extent New subjects have been added over the years to medical curricula Nevertheless there has often been a reluctance to remove older topics possibly limiting the medical training course's ability to develop as expected The transition from theories of higher education to the reality of curriculum planning and design is a huge leap An important question is how to translate the mission of higher education in general which has been variably described as a training of reflective individuals who possess both culture and expertise and can master any subject with facility into a coherent teaching program The mission of medical education includes the promotion of professionalism in learners by including courses in medical ethics that have become integral to medical education in the USA However despite the development of standards and competencies related to professionalism there is no consensus on the specific goals of medical ethics education the knowledge and skills expected of learners and the best pedagogical methods and processes for their implementation and assessment A significant contribution to the clinical teaching literature Curriculum Design Evaluation and Teaching in Medical Education should be of interest to a variety of readers including

clinical educators administrators health care professionals and especially residency directors **Dance Teaching Methods and Curriculum Design** Gayle Kassing, Danielle Jay-Kirschenbaum, Danielle Mary Jay, 2021 Dance Teaching Methods and Curriculum Design Second Edition presents a comprehensive model that prepares students to teach dance in school and community settings It offers 14 dance units and many tools to help students learn to design lesson plans and units and create their own dance portfolio **Interdisciplinary Curriculum** Association for Supervision and Curriculum Development, 1989 Explore the two important criteria to which every interdisciplinary program must adhere and read about six design options for an interdisciplinary curriculum *Motivation, Leadership and Curriculum Design* Caroline Koh, 2015-01-06 This book discusses the links between the basis of motivational leadership and curricular constructs with regards to 21st century and net generation learning It brings together recent developments in motivation educational leadership and curriculum design in order to offer a better understanding of what is already known and what is yet to be explored in these fields It consists of a collection of findings on recent educational developments including topics such as motivating the 21st century learner leadership practices and influences curriculum design and models novel learning environments and 21st century learners and their needs
