**Publication** American Sociological Society, 1911 *Report Writing for Police Officers (2nd ed.)* Wayne L. Davis, Ph.D., 2013-11 This book is designed for criminal justice instructors. It requires them to help students work through the various police reports. The reports are intentionally left incomplete to require students to work through them. Some reports may seem to ask confusing questions which may lead to unreliable responses. This is to be used as a lesson. Unreliable responses create statistics that are not valid. Managers need to improve the forms in order to obtain valid data. This book first discusses communication theory and how it applies to police officers and prosecutors in the courtroom. Information presented in the courtroom by police officers has a significant impact upon the jurors. Indeed, police officers communicate both verbally and nonverbally in the courtroom and this affects their credibility on the stand. Furthermore, by employing persuasion theories, prosecutors can align the officers' testimonies to the jurors' particular communication preferences. Second, this book discusses truth as it relates to probable cause and beyond reasonable doubt. Finally, because report writing is a significant part of police work, this book presents a variety of police forms that will engage students in written communication.

**High-Performance Coaching for Managers** William J. Rothwell, Behnam Bakhshandeh, 2022-07-05 Coaching is a necessary skill for managers. It is important as a fundamental part of an organization's talent efforts, including talent acquisition, development, and retention strategies. For a coaching program to succeed in an organization, it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture. Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching. This book differs significantly from other books in the coaching market. Many books on coaching cast coaches as facilitators who question their clients, the coachees, helping them to articulate their own problems, formulate their own solutions, develop their own action plans to solve problems, and measure the success of efforts to implement those plans. That is called a nondirective approach. But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems. While there is nothing wrong with a nondirective approach, it does not always work well in job performance reviews in which the manager must

inform the worker about gaps between what is needed the desired and what is performed the actual The significant difference between what is currently available in the market and what is offered in this book is the authors collective experience of over 70 combined years of hands on research and delivery experiences in the Human Resources Development field According to the Harvard Business Review 2015 workers generally expect their immediate supervisors to give them honest feedback on how well they do their jobs and specific advice on what to do if they are not performing in alignment with organizational expectations When workers do not receive advice but instead are questioned about their own views they regard their managers as either incompetent or disingenuous Effective managers should be able to offer direction to their employees After all managers are responsible for ensuring that their organizational units deliver the results needed by the organization If they fail to do that the organization does not achieve its strategic goals This book gives managers direction in how to offer directive coaching to their workers
